All prices without VAT. All prices listed are prices per piece. For orders below Euro 50.– net value we charge Euro 6.– minimum order requirement fee. Please note our packing units. We ask for your understanding. New prices valid as from January 2011

Since 1930. The perfect connection.

For more than 80 years we are the competent partner for coupling systems in construction or industry, from our standard program or as special production.

We produce couplings and fittings for various applications in most different branches, distributed world-wide by technical specialized trade partners or used by leading mechanical engineering companies.

The quick connection

We have a quality management system according to ISO 9001-2008 since 1994. Our quality standards find world-wide recognition and meet highest requirements.

We're looking forward to a successful cooperation with you!

LÜDECKE

Since 1930. Coupling Systems Made in Germany

Our sales team provides you with

- technical product advice
- advice for special productions
- application recommendation
- order acceptance
- order processing
- enquiry acceptance

easy by phone, fax or E-mail.

Since 1930. The perfect connection.

Since 1930. The perfect connection.

Founded in **1930** as E.G. Lüdecke KG, the breakthrough for the engineer Emil Georg Lüdecke came with the invention of the today world-wide used claw coupling for compressed air. A simple but brilliant principle of a universal quick coupling system to connect various types of threads or stems through symmetrical coupling heads by turning them 45°.

In **1943** the company at Leipzig was completely destroyed by a bomb attack, the family Lüdecke had to flee to Amberg, where in **1949** they tried a new start. In the beginning production was made in smallest dimensions, but mainly as a result of the fast growing export the production raised rapidly, and so the first plant was built in **1958**. Ten years later this plant was also too small, and so a new plant was built again in...

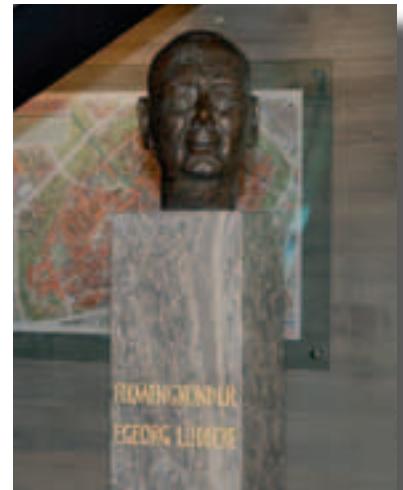

History

1969, in which, after meanwhile six further extensions, Lüdecke produces and distributes its products today. In **1986** Erwin Bogner, who was the general manager and partly owner since 1955, bought the company completely.

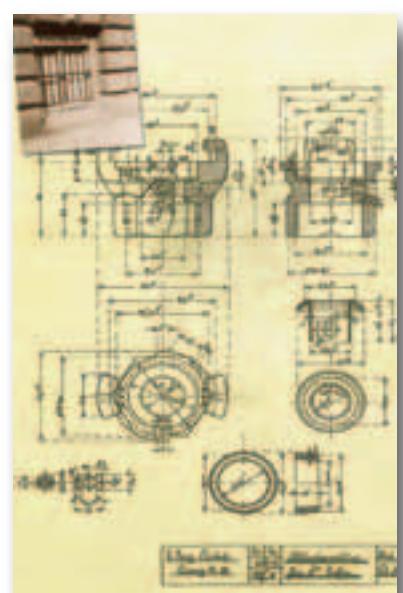

Lüdecke is still today a family run company. In **1995** the Lüdecke Armaturen GmbH was founded, which is today responsible for the operative business.

By now, the the production program covers more than 15.000 articles, distributed with more than 200 consignments per day in 120 countries all over the world.

Emil Georg Lüdecke (*01.01.1890 – †31.12.1973)
founder of the Lüdecke Company

We are the **right contact for coupling-systems** for most different lines of business, media, pressure and temperature areas, for most different applications whether as a standard or special production.

of a Claw coupling in the year 1937

LÜDECKE

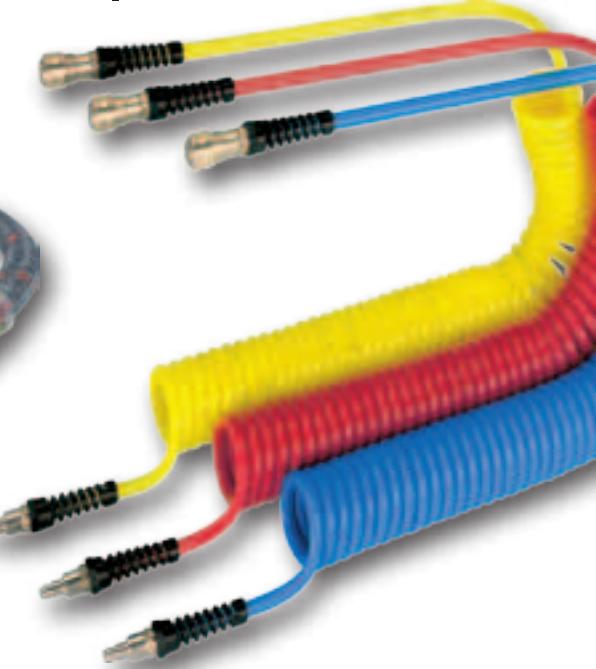

Since 1930. Coupling Systems Made in Germany

LÜDECKE

Continuity as a result of progress and flexibility

The development | The materials | The quality

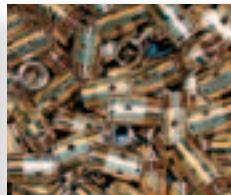

The development

Our ideas and our creativity safeguard our lead in the competition.

It's our essential aim to develop new products meeting our customers' requirements and to optimize existing products.

We develop coupling systems for most different media, fields of application, temperatures and pressures, such as our new coupling systems for temperature regulation lines.

The materials

High-quality raw materials of reliable suppliers are the basic prerequisite for the production of technically demanding quality products.

All common metals, such as malleable iron, steel, brass, ECOBRASS®, aluminium or high-grade steels of different qualities are processed as well as polyurethane in our spiral hose production.

The quality

The satisfaction of our customers decides on our future. Our products offer clear advantages and optimum use for the customer, primarily with respect to quality, program breadth, price and delivering ability. Being faster and better has to be proved newly each day. Our quality guidelines guarantee the highest precision, supervised by independent examination institutes.

LÜDECKE

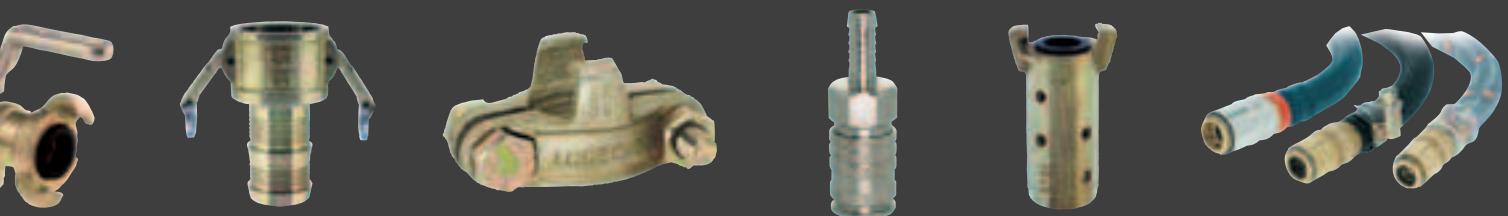

Since 1930. Coupling Systems Made in Germany

Top Quality Made in Germany

Since 1930. Quality as a result of precision.

The production

It requires a high automation level to manufacture competitively in Germany. Computer integrated manufacturing (CIM) from the drawing construction on AutoCAD Inventor up to the automatic quality safeguarding of the CNC production by means of SPC guarantees a maximum amount of productivity – round-the-clock.

All competences in house guarantee speed and flexibility.

Our production disposes about: CNC high-performance turning machines, CNC milling machines, mechanical turning machines, multi spindle chucking automatics, CNC six spindle

turning machines, part washes, electroplating plant, tool engineering, assembly lines, packing machines a.s.o.

A general bar code system from the receipt of raw materials up to the sale of finished goods as well as BDE supervision of all our production stages guarantee a checked and optimized production and material flow.

Highly qualified and highly motivated employees work with the latest machine technology in our production for a maximum quality level.

Logistics System

Perfect service, quick and reliable world-wide

The Logistics

With more than 15.000 sales capable products it can only be ensured to serve our customers reliably, fast and economically by most modern sales- and store software and -technology.

Latest fully automatic high shelf technology, dispatch system integrated, connected directly to company software system guarantees fastest delivery ability.

Exact packing of ordered goods guaranteed by integrated weight control at the predefined part taking. Parallel print and email of all dispatch and delivery papers.

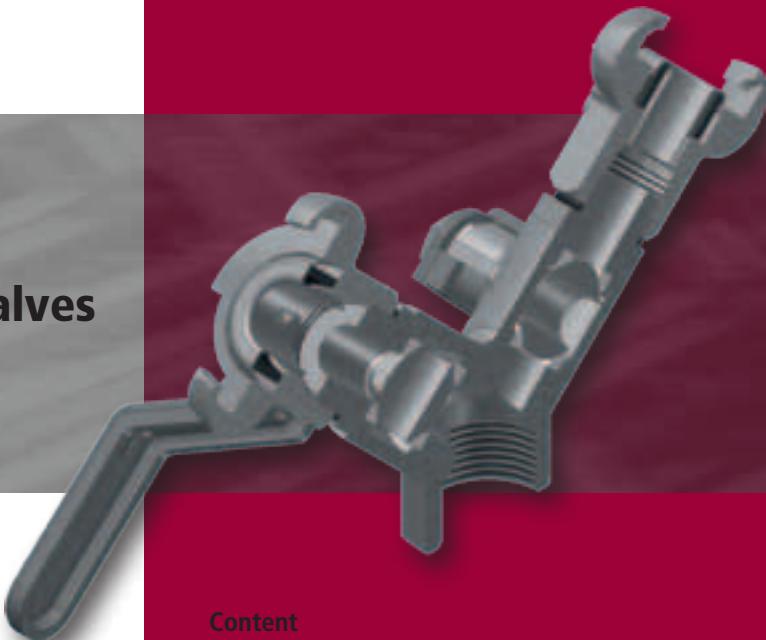

Ball Valves and Throttle Valves

Ball- and Throttle Valves serve as shut-off fittings in pipe-systems for compressed air and other fluids.

Ball valves seal through PTFE-Shells, throttle valves are sealing metal against metal under pressure.

Ball valves are preferred at industrial installations, throttle valves are more suitable under extreme conditions in construction.

Content

- 15 Ball Valves**
 - 15 Heavy Design, brass nickel plated Ball Valves
 - 15 Double Ball Valves and Airhammer Ball Valves
 - 16 Light Design, brass nickel plated Ball Valves
 - 17 Three-way Ball Valves
 - 17 Hexagon Ball Valves
- 18 Throttle Valves**
 - 18 Standard Execution
 - 19 US-Execution

Ball Valves

Heavy design, brass nickel plated

- Ball valves for air, water and many other fluids of high quality and extraordinary standard.
- Maintenance-free operation, long-living, sturdy and reliable, easy switching with full free passage, tested of tightness.
- For Industry, Construction and civil installations.

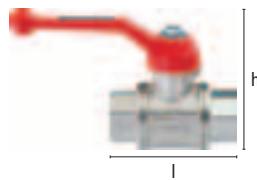

body and sockets:	brass, sandblasted and nickel plated
spindle and nut:	brass
ball:	brass chromed
ball seals:	PTFE

Throttle Valves

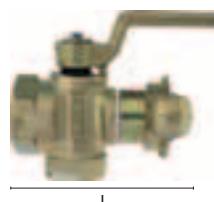

Standard Execution

New!

- Extremely robust valves of malleable iron, zinc plated and yellow passivated (free of chromeVI)
- With brass throttle and handle of malleable iron
- Self sealing, under pressure the conical throttle is pressed against the body, so the valve gets tight, therefore no wear of seals
- With threads or claw couplings with rubber or brass seal
- When switching off pressure drop through exhaust from outlet side, therefore easy and safe coupling
- For compressed air in construction, on compressors, hose lines and air tools

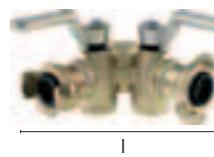

Max. Working Pressure	Temperature	Material	Medium	Threads	Claw Distance	DIN	
PN 10 bar	-15°C – +80°C	malleable iron	compressed air	ISO 228	42 mm	≤ below	1

- ❶ without coupling
- ❷ with coupling
- ❸ coupling with rubber seal
- ❹ coupling with brass seal

Claw Couplings are a symmetric quick coupling system with two claws each, which are connected by simultaneously applying force and rotating the two claws to be 45° apart.

All connections and sealing systems have the same head dimensions, therefore all types are always interchangeable.

The recommended combination is a standard coupling with a MODY-coupling as the counter part (easy to couple, 100 % tight, absolutely safe).

It is very important to use always couplings made of malleable iron, which is as a result of its special heat treatment suitable for thin-walled parts and which is the only recommended casting material according to DIN 3489 and 3238

Claw Couplings

Swivelling Claw Couplings

DIN 3489

New!

- High quality couplings, head of malleable iron, hose stem of turned steel with special profile, zinc plated and yellow passivated (free of chrome VI)
- 360° swivelling, easy turning under pressure, therefore no hose twist
- 2 parts, sealing through 2 O-Rings, swivelling on 2 teflon-discs, safe and protected
- 100 % tight through machined gasket seat, standard rubber ring can be used
- Full bore for increased flow capacity
- On request with steam resistant rubber ring against extra charge
- 100 % couple test and sight control
- For flexibility of compressed air lines in construction and industry, if used as thread coupling assembled at the tool up to 10 times higher durability compared to rigid standard couplings! The swivel principle absorbs all vibrations!

Max. Working Pressure	Temperature	Material	Mat. Seals	Norm	Medium	Threads	Claw Distance

Claw Couplings

MODY-Screwing Couplings DIN 3238

- High quality safety coupling, head of malleable iron, hose stem of turned steel with special profile, zinc plated and yellow passivated (free of chrome VI)
- Stronger thread - protective ring and new rubber ring, on both sides led in gasket seat
- With oil resistant rubber ring, on request with steam resistant rubber ring (up to 200°C), against extra charge
- 100 % tight, reduces expensive air consumption
- Easy to couple, secured against accidental opening, just screw ring after coupling!
- 100 % couple test and sight control
- Maximum bore for more flow capacity
- For absolutely safe air lines in construction and industry

SSG

SSGA

SSGI

New!

SGOR-N

SDOR-N

MODY-Screwing Couplings made of stainless steel

EKS

Sealing ring

SVOR-N

New sealing ring, lead on both sides in new gasket seat

3238

Special requirements

- Threads according to DIN-ISO 228/1
- Claw couplings and sealing rings corresponding to this standard have to be marked with manufacturers name!
- Working pressure max. 16 bar
- 100 % sight control required
- 100 % couple test with test gauge required.
- Certified material:
 - Malleable Iron: EN-GJMW-400-5(EN-JM1030) according to DIN EN 1562
 - M1-Alloy: Alloy DIN 17660-CuZn39Pb2 (2.0380)
 - Steel: Type to be chosen by manufacturers 11SMnPb30 (1.0718) according to DIN EN 10087 · 11SMnPb30 (1.0718) according to DIN EN 10277-3
 - X5CrNi Mo 17-12-2 (1.4401) according to DIN EN 10088-1· G-X5CrNiMo 19-11-2 (1.4408) according to DIN EN 10213-4
 - G-X5CrNiMoNb 19-11-12 (1.4581) according to DIN EN 10213-4
- New claw dimensions
- New sealing ring
- New gasket seat to lead sealing ring on both sides

Warning!

Compressed air can be a dangerous medium that requires strict safety rules while handling which have to be observed to avoid serious accidents. Today on the coupling market asian low-price copies often appear, made of low-grade and not certified material, in most cases inferior casted and machined. The use of these couplings hides an uncalculable safety risk. No secure hose fit can be guaranteed, as a result of big

tolerances a lot of these couplings are very hard to couple or even can not be coupled, threads are not true to gauge. Very often claws, thread ends and gasket seats are melted out, claw distances are too big or have offset lugs. Moreover these couplings are mainly casted in too hard material and therefore brake under heavy strain. Sealing rings often are not oil resistant.

These couplings appear to be a substantial safety risk and should not be used!
They do not at all correspond to the DIN Standards!

LÜDECKE – Information regarding the new Standards

G-X5CrNiMoNb 19-11-12 (1.4581) according to DIN EN 10213-4
- New claw dimensions

Test gauge for claw couplings

We always recommend to use a standard coupling according to DIN 3489 and as the counter coupling a mody screwing coupling according to DIN 3238. This connection is absolutely safe, easy to couple, 100 % tight and secured against unintentional opening. Also for safe hose assembly always use clamps according to DIN 20039. Malleable Iron according to DIN EN 1562 avoids as a result of its toughness and flexibility breaking of the couplings under heavy strain. These characteristics are essential e.g. for the use directly on compressed air hammers and therefore malleable iron is according to DIN 3489 and DIN 3238 the exclusive casting material for claw couplings.

Claw Couplings

with brass seal

New!

- Robust couplings of malleable iron, zinc plated and yellow passivated (free of chrome VI)
- 100 % couple test and sight control
- With brass seal, oil-resistant hose ring and zinc plated screw
- Easy to couple, no independent remove of the seal
- Always to be coupled with a standard claw coupling with Perbunan seal!
- Universal couplings for air lines in construction or industry, mainly used directly on compressor or air tool

Max. Working Pressure	Temperature	Material	Medium	Claw Distance	Mat. Seal	Threads

Complete Screwing Sets Connecting Nipples Hose Connections

Complete Screwing Sets are extremely robust fittings for construction, tunneling and mining. A tapered stem with connecting nut is screwed with a nipple with cone. Taper and cone are sealing against each other without sealing material.

Thread stems and hose connections serve in various fields for connection or lengthening of hose lines.

Content

- 37 Complete Screwing Sets DIN 8537/20 033
- 39 Complete Screwing Sets, flat sealing
- 40 Connecting Nuts and Tapered Stems DIN 8537/20 033
- 42 Connecting Nipples with Cone, Hot Tar Screwing
- 44 Thread Stems
- 45 Hose Connections

Complete Screwing Sets

DIN 8537/20 033

New!

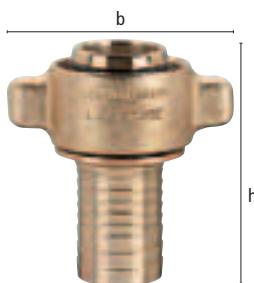

- Complete Screwing Sets of malleable iron / steel, zinc plated and yellow passivated (free of chrome VI) consisting of connecting nut and tapered stem
- Complete Screwing Sets with safety collar and turned stem profile for perfect fit of the hose
- Tapered stems with cone 1:3 generally with additional O-ring sealing
- Suitable for connecting nipples (⊕ catalogue page 42 / 43)
- World-wide used system for compressed air, water... in construction, mining or tunneling.

Connecting Nuts and Tapered Stems

DIN 8537/20 033

New!

- Screwings with cone of malleable iron / steel, zinc plated and yellow passivated (free of chrome VI), consisting of connecting nut and tapered stem
- Turned stem profile for perfect fit of the hose
- Tapered stems with cone 1:3 generally with additional O-ring sealing
- Suitable for connecting nipples (catalogue page 42 / 43)
- World-wide used system for compressed air, water... in construction, mining or tunneling.

Hose Clamps and Clips

High Performance Hose Clips

Sockets

Crimping Machine

For hose assembly of fittings different assembly methods from strong clamps to light clips or sockets can be used according to application, medium, pressure or hose material.

The necessary method depends on criterions like safety instructions, removable or not, quickness, necessary devices (e.g. crimping machine), or no danger of hurt (e.g. by overstanding screws).

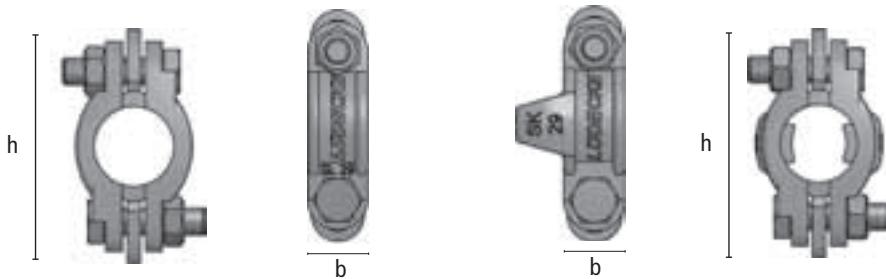

Content

- 47 Hose Clamps of malleable iron
- 48 US-Hose Clamps of malleable iron
- 48 Two-Ear-Hose Clips
- 49 High Performance Hose Clips:
 - 49 DIN 3017 of Steel W1
 - 50 DIN 3017 of Stainless Steel W5
- 51 Low Pressure Sockets and Crimping Machine

Hose Clamps

- Robust clamps of malleable iron, zinc plated and yellow passivated (free of chrome VI)
- Easy and secure, for various fittings and applications

High-Performance Hose Clips

DIN 3017 of Steel W1

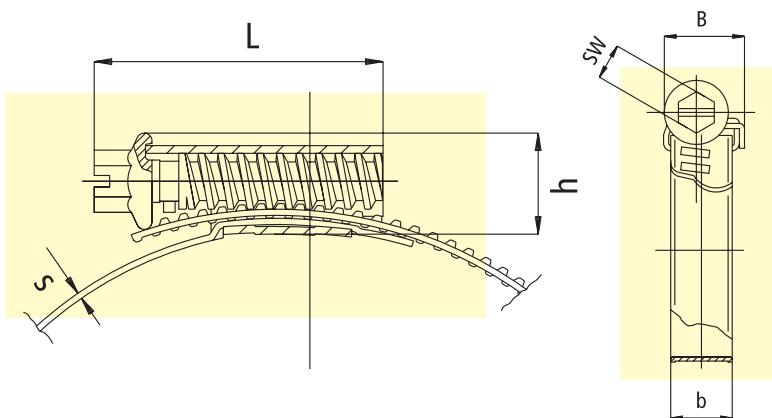

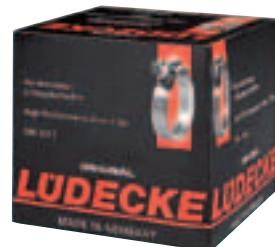

- Hose clips of steel W1, chrome-VI-free zinc plated and passivated
- Optimum sealing through high band tension – maximum strip safety
- Hose-protective through rounded edges and smooth band inside
- Thinner screw body with new position, therefore improved torque
- Material and clamp range stamped at inner band side
- Hexagon screw with cross-slotted head
- Regularly spaced tension over complete hose diameter
- Up to size 90 in boxes, sizes 100–180 in plastic bags, from size 190 on loose
- For safe, fast and removable use on various hoses and fittings for different fluids**

Improved Execution!

Sockets for Low Pressure Hose Lines

- Sockets of redhotted steel, zinc plated and yellow passivated
- Easy, fast and absolutely safe hose crimping with
LUDECKE-Hand-operated assembly machine SPR 333 up to type LPH-23
- No danger of hurt, closed and unremovable connection
- For crimping of various hoses and fittings for different fluids

Max. Working Pressure		Material			Medium

For higher Working Pressure we recommend hydraulic crimping with turned steel-sockets type PH (catalogue page 59) or on request.													

Hand-operated Assembly Machine for low pressure sockets

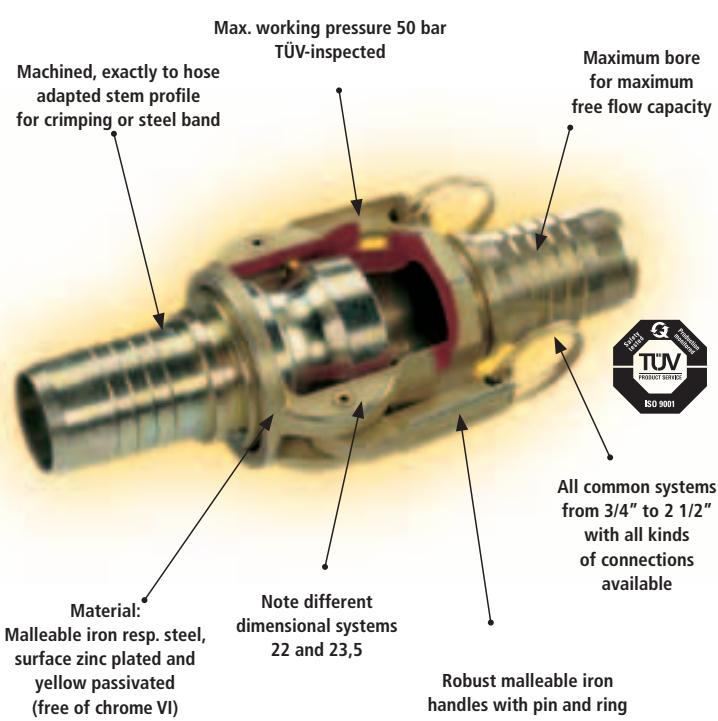

- Crimping machine for easy and safe assembly of low-pressure hoses from 3 to 20 mm Hose i.D.
- **Clean:** Exact assembling of fitting, hose and socket through centric crimping of the socket
- **Cheap:** Fast assembling at reasonable costs
- **Safe:** Improved safety through perfect fit
- **Elegant:** Reduced danger of hurt
- With two crimping-jaw sets for crimping range from 3 to 20 mm and from 10 to 20 mm,
- **Flexible:** For mobile use

For hoses

Mortar Couplings Mortar Plugs

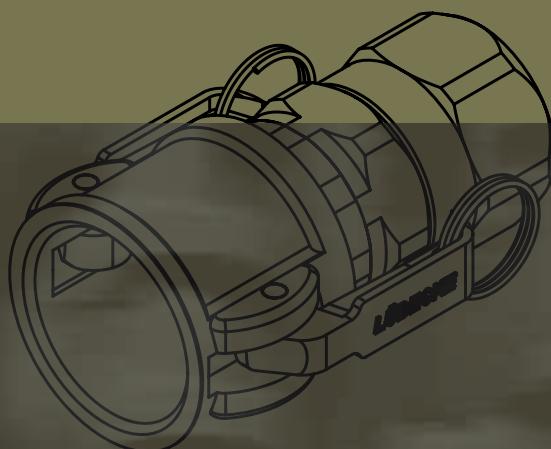

The principle of the Mortar Coupling is similar to Kamlok Couplings, but both are not interchangeable.

Asymmetrical female and male parts made of malleable iron or steel are locked by two handles. Please note the two different systems used in the market!

At a working pressure of 50 bar exact hose assembly with precisely machined hose stems is absolutely necessary. For safety reasons we recommend to use hydraulic crimping sockets.

To ease daily work one part of the coupling system should be a swivelling type to avoid hose twist of the rigid mortar hoses

Content

- 53 Mortar Couplings – of Aluminium**
- 53 Mortar Couplings - System "Mai"**

Mortar Couplings of Aluminium

Type Size X25, rigid and swivelling

- Mainly used directly at the spraying nozzle, 60 % weight reduction compared with steel execution, therefore essentially easier application
- Swivelling execution three parts, lead in teflon slide, therefore extremely robust and tight
- Swivelling principle avoids hose twist of the rigid mortar hoses for much easier application

Standard-Mortar Plugs

of malleable iron / steel, rigid and swivelling

- Plugs of malleable iron / steel, zinc plated and yellow passivated (free of chrome VI)
- Turned stem profile for perfect fit of the hose (On request according to drawing or hose sample)
- TÜV-inspected
- Attention: Only same type-size and same system interchangeable!
- For mortar and concrete lines on pumps, spraying devices, plastering machines a.o.

New!

Sandblast Couplings

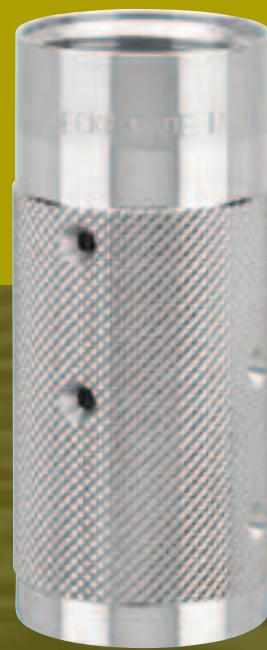

A coupling system related to claw couplings, always identical head dimensions and therefore always interchangeable.

Couplings of malleable iron are very robust, couplings of nylon are mainly used because of weight reasons.

We generally recommend to use always safety clips or system DSR to avoid accidental opening.

Hose assembly is completed inside the coupling (hose against seal), the hose is then fixed by screws from outside!

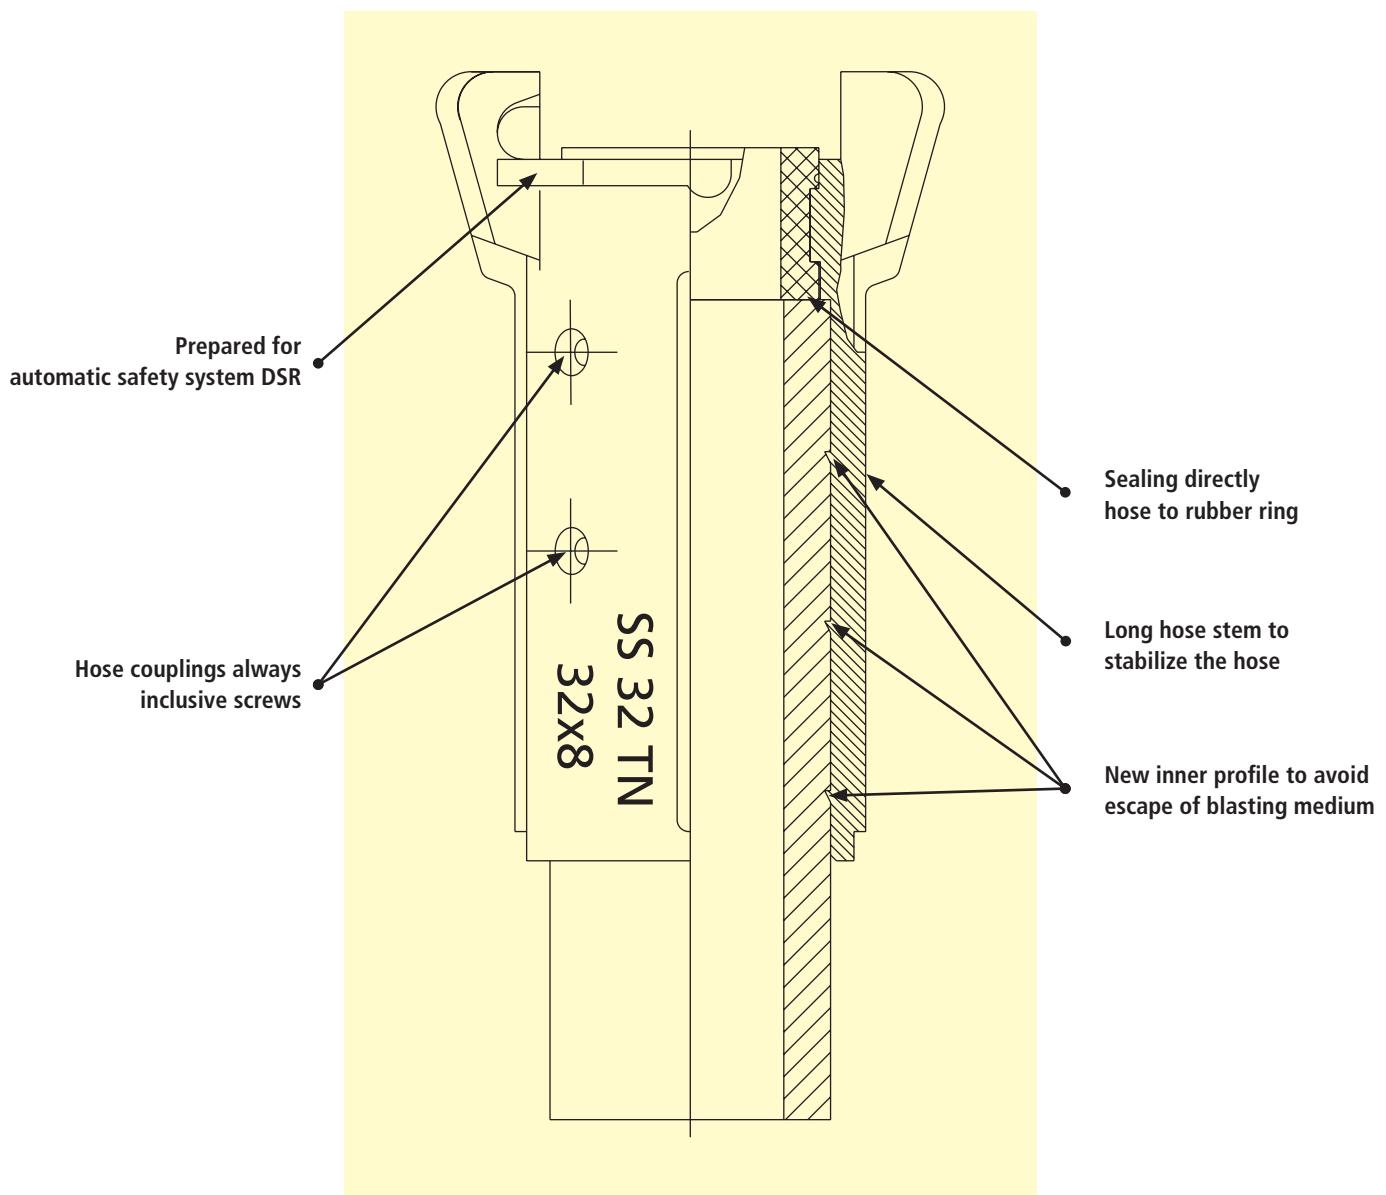

Content

- 61 Advantages of the new type TN
- 62 Sandblast Couplings and Nozzle Holders of malleable iron / aluminium
- 63 Sandblast Couplings and Nozzle Holders of Nylon

Sandblast Couplings and Nozzle Holders

Advantages of the new type "TN"

Sandblast Couplings and Nozzle Holders

New!

- Couplings of malleable iron, zinc plated and yellow passivated (free of chrome VI) resp. of nylon
- Nozzle holders of aluminium resp. nylon
- Hose couplings and nozzle holders generally with screws
- We recommend in all cases to use our safety-clip USC-1 and for all types 'TN' to use the automatic safety system DSR (for nylon couplings always inclusive) for your own security
- Types 'TN' with direct sealing hose to gasket and extended stem with new inner profile to avoid escape of blasting medium
- To be used on all stationary and mobile blasting machines and plants

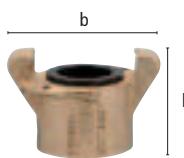

Max. Working Pressure	Material	Mat. Seal	Medium	Threads	Claw Distance

1.4401 DIN EN 14 420-7/MIL-NORM

67 Kamlok Quick Plugs of stainless steel 1.4401

DIN EN 14 420-7/MIL-NORM

68 Spare Parts for Kamlok Quick Couplings

70 Thread Stems DIN EN 14 420-5

of stainless steel 1.4401 electro polished

Kamlok Quick Couplings: An asymmetrical coupling system, male and female parts are locked by two handles. Hose assembly for MIL-Norm couplings with standard clamps, for DIN EN 14 420-7 couplings with forged clamps VG 85328.

Thread Stems DIN EN 14 420-5: Universal fittings for connecting hoses, hose assembly with forged clamps.

Forged Clamps VG 85328: Very safe, removable hose assembly method, but only suitable for special adapted fittings and couplings.

Steam Screwings DIN EN 14 423 Universal and absolutely safe assembly of hoses for steam and hot water. One unit of thread stem and robust brass clamp.

Suction Hose Couplings are mainly used for bulk material, f. e. vacuum-conveying of granulate material in the Plastics Industry

Kamlok Quick Couplings and Plugs

DIN EN 14 420-7 (formerly DIN 2828) of stainless steel 1.4401 electro polished

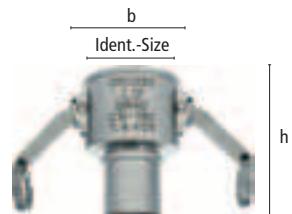

- High quality, robust couplings acc. to DIN EN 14 420-7 for aluminium clamps
- Interchangeable with world-wide used types
- Surface electro polished, Couplings generally with handle securing and safety clips
- Rubber Rings of Perbunan, Hypalon, EPDM and FPM and handles as spare parts available
(catalogue page 68 / 69)
- Hose stem machined
- Attention: only same type-size interchangeable!
- Universal coupling for aggressive fluids (according to concentration) in chemical- and petrochemical industry, steel-, food plants, medicine technique, off-shore or agriculture. EPDM sealing ring with approval for edibles/foods

Max. Working Pressure	Material	Mat. Handle	Mat. Seal	Medium	Norm	Temperature

Aluminium Clamps (catalogue page 71)

Current information about standards:

- DIN 2828 is replaced by DIN EN 14 420-7
- New form marking: female part with stem: form CC
female part with female thread: form DF
female part with male thread: form BF
female part with blind cap: form DC
male part with stem: form EC
male part with female thread: form AF
male part with male thread: form FF
male part with sealing plug: form DP
- The form markings on female and male are adapted accordingly
- Type approval tests and quality control:
all types are checked using test jack connectors and defined test criteria
- Producer should be certified according to DIN EN ISO 9001 : 2000
- New maximum operating pressure of 16 bar resp. application limit of used pipes or hose lines
- The transition period for the new standard defaults amounts to 3 years

New!

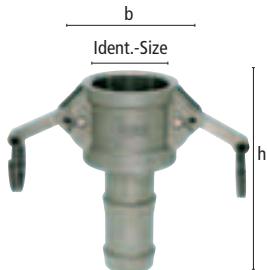

Kamlok Quick Couplings

of stainless steel 1.4401

- High quality, robust couplings acc. to US-Mil.-Standard (MIL-C-27487) resp. DIN EN 14 420-7 (formerly DIN 2828)
- Interchangeable with world-wide used types
- Couplings generally with handle securing and safety clips (steel, zinc plated)
- Female threads with thread sealing ring of PTFE
- Seals of Perbunan, Hypalon, EPDM and FPM and handles as spare parts (☞ catalogue page 68 / 69)
- **Universal coupling for aggressive fluids (according to concentration) in chemical- and petrochemical industry, steel-, food plants, medicine technique, off-shore or agriculture**
- **Current information about standards for DIN EN 14 420-7 (☞ catalogue page 65)**

Thread Stems DIN EN 14 420-5

(formerly DIN 2817) of stainless steel 1.4401 electro polished

- High quality, robust female- and male-thread hose stems according to DIN EN 14 420-5
- Surface electro polished
- Plain hose stem with safety collar for aluminium forged clamps type KSA
- Female threads flat sealing with thread-sealing ring of PTFE (☞ catalogue page 68)
- For direct connection or as adaptor for Kamlok-couplings, tank truck couplings...
- For aggressive fluids (according to concentration) in chemical- and petrochemical industry, steel- or food-plants, medicine technique, off-shore or agriculture

New!

Hose assembly of forged safety clamps and hose fittings

1. Hose stem brushed with lubricant is pressed into straight-cut hose
2. Clamp halves are put in safety collar around the hose and fixed with care in a vice
3. 4 Screws are fixed regularly (rightly dimensioned hoses keep a small slit between clamp halves)

Thread Stems DIN EN 14 420-5

(formerly DIN 2817) of brass MS 58

- High quality, robust male thread hose stems
- Lightly grooved hose stem with safety collar for aluminium forged clamps
- For direct connection or as adaptor for Kamlok-couplings, tank truck couplings.
- To be used for aggressive fluids (according to concentration) in chemical- and petrochemical industry, steel- or food-plants, medicine technique, off-shore or agriculture

Max. Working Pressure	Material	Medium	Norm	Threads	Temperature	
PN 25 bar	MS 58	various	DIN EN 14420-5	ISO 228	-40°C – +95°C	1

Hose assembly of hose lines according to DIN EN 14 423

1. Hose stem (brushed with lubricant if needed)

At hoses with marking M the metallic conductor has to be connected with the screwing.

There should be a short distance between safety collar and hose end to take hose material compressed during assembly.

2. Clamp halves are put in safety collar around the hose and fixed over cross with assembly-help screws.

3. Put in clamp screws and fix over cross.

4. A small, parallel slit should remain between clamp halves.

5. After putting the hose into operation the screws should be fixed again.

Current information about standards:

- DIN 2826 is replaced by DIN EN 14 423.
- The form markings on the parts are adapted accordingly.
- All types are checked using defined test criteria.
- Producer should be certified according to DIN EN ISO 9001 : 2000.
- The transition period for new standard defaults amounts to 3 years.

New!

Suction / Conveying Hose Couplings

We produce exactly measured coupling systems for vacuum or pressure conveyance of different fluids or solids (granulates etc.) using spiral hoses of different makes for interior and external binding. Additionally as pipe connection or as bulkhead fitting (e.g. for distribution devices).

Material: aluminium, stainless steel, steel

Details on request

Measures: 1" to 4"

Mostly with male thread for screwing on of coupling systems Storz, Guillemin or tank truck couplings resp. with direct coupling adaptor system Kamlok

- Our adaptor systems are used successfully mainly in the plastics industry and in agriculture.

SoftFlow Suction Hose Quick Couplings

of stainless steel 1.4305, DN 41

New!

- High quality quick coupling system for pressure-resp. vacuum-conveying of bulk material or liquids, f. e. for vacuum-conveying of granulate materials in the plastics industry
- Stainless Steel for less abrasion
- Coupling sleeve, plug and cap aluminium (hard coated)
- Full free passage
- Light weight, easy to handle
- Quick coupling principle with ball shut-off for easy operation
- Easy manual replacement of sealing rings
- Perfectly adapted hose stems for PVC- or polyurethane spiral-suction hoses, for other hose dimensions on request
- Plugs for pipe connection with double O-ring sealing and fixing with screw

Max. working pressure	Vacuum	Material	Mat. seals	Temperature	DN

High-Pressure Coupling Systems for Snow Pump Installations

Hose Connections

Exact list of available
hose types and crimping sockets
on request!

Optimized stem outlines for different hose assembly methods

Stem outline for hose assembly with
forged safety clamps type KSA
(catalogue page 80)
Attention: Not possible for each flat hose,
usually a cover hose is required!
No TÜV-inspection for this assembly method!

Stem outline for hydraulic
hose crimping with turned
steel crimping
sockets type PH
(catalogue page 80)

Stem outline for steel band

Stem outline for steel wire

Our stem outlines are exactly adapted to different hose types and are developed for different assembly methods. They are tested by our quality department on our inspection devices and are working with perfect results in practice since years.

Our coupling systems guarantee best safety at work for snow making equipment under extreme environmental conditions (snow, ice, sun, huge temperature variation) and offer best protection against accidents at high-pressure applications.

For each order the exact hose type and chosen assembly method has to be notified to choose the suitable hose stem execution!

High-Pressure Quick Couplings

of stainless steel 1.4401 – System Kamlok PN 60 bar

New Types!

- High-Pressure type, coupling dimensions according to US-Mil-Norm (C-27487) resp. DIN 2828
- Essentially stronger housing
- Handle securing with robust chain and safety clip
- Investment casted handle with high-pressure pins crimped on both sides
- TÜV-inspected for 60 bar working pressure (burst pressure test 150 bar) for liquids **
- Special Coupling System to be used on snow pump installations, tunneling or different high-pressure applications with liquids

Max. Working Pressure	Material	Mat. Handle	Mat. Seal	Medium	Norm	Threads	Temperature	Box
PN 60 bar **	1.4401	1.4401	Perbunan	liquids	MIL / DIN	ISO 228 / DIN 2999	-40°C – +95°C	1

Couplings with hose stem for flat hoses or rubber hoses

1" + 1 1/2" + 2" + 2 1/2"	89	SKH 1

Drain Adaptor

with 3 Automatic-Run-Out-Valves 3/4" and 2 fixing spears

Drain-Adaptor with 3 Automatic-Run-Out-Valves 3/4"

Type-Size	Connection	DN	Ident-Size	Weight/pc. g	Type No.
150 = 1 1/2"	Coupling / Plug	40	54 / 53.4	2870	SKK 150 EA
200 = 2"	Coupling / Plug	50	63.8 / 63	4039	SKK 200 EA
Automatic-Run-Out-Valves also available separately (7 bores)				160	EWV 34
Automatic-Run-Out-Valves also available separately (1 bore)				170	EWV 341

Opening pressure of valves approx. 1 bar!

Drains the lines automatically when installation is switched off and pressure drops to avoid frost damages.

Simply assemble the adaptor at the lowest point between snow pump and hydrant and fix it with two spears (60 cm long) in suitable position.

SNOW MASTER

High-Pressure Screwings of zinc plated steel

New!

- Thread Stems for long-term steady installations of pipe and hose lines, extreme robust execution
- Female thread stems with swivelling nut, flat sealing with thread sealing ring
- Appropriate safety clamps and crimping sockets (catalogue page 80)

New!

Male thread screwings for flat hoses or rubber hoses

Thread	Hose i.D.	ØSW	DN	Weight/pc. g	Type No.
R1"	25-28 mm	36	20	220	SGA 100-T
R 1 1/2 "	38-40 mm	50	40	372	SGA 150-T
R 2 "	38-40 mm	60	40	210	SGA 200/150-T
R 2 "	50-54 mm	60	50	620	SGA 200-T

New!

Female thread screwings for flat hoses or rubber hoses (with screwing nut)

Thread	Hose i.D.	ØSW	DN	Weight/pc. g	Type No.
G1"	25-28 mm	41	20	250	SGI 100-T
G 1 1/2 "	38-40 mm	55	40	390	SGI 150-T
G 2 "	50-54 mm	70	50	640	SGI 200-T

Attention: For 1 1/2" and 2" hose connection each 9 different stem outline types and sizes are available as standard execution! For each order the exact hose type and size and preferred assembly method has to be notified to be able to choose the right hose stem execution! For new stem outlines: minimum quantity is 50 sets.

Other sizes on request!

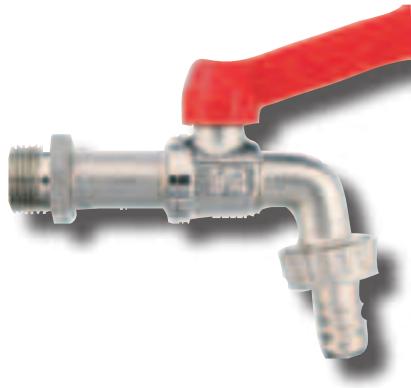

Picture is available as poster on request!

LUDECKE

Coupling Systems Made in Germany

Lüdecke **SNOW MASTER** coupling systems, TÜV-certified and recommended for "safer snow".

Water Couplings and Fittings

High quality original GEKA plus claw couplings, connection similar to compressed air claw couplings, but not interchangeable.

Additional fittings for water lines in various fields with spray nozzles, standard fittings, valves and taps.

Content

- 85 Swivelling- and MODY-Claw Couplings of brass
- 86 Original GEKA plus Claw Couplings of brass
- 87 Original GEKA Spray Nozzles of brass
- 88 Original GEKA X-plus Claw Couplings
- 88 Male thread nipples with thread ferrule of brass
- 89 Original GEKA plus Claw Couplings of stainless steel
- 90 Fittings und Ball Valve Taps
- 91 Check Valves and Foot Valves with Strainer

Swivelling- and MODY-Claw Couplings of brass for water

- High quality couplings of forged brass MS 58
- Universal couplings for water lines in industry, construction, garages, agriculture or civil installations

Max. Working Pressure	Temperature	Material	Mat. Seal	Medium	Claw Distance	
PN 10 bar	up to +95°C	MS 58	NBR	water	40 mm	5

Original GEKA swivelling hose claw couplings with straight stem, 360° axial swivelling

Hose i.D.	DN	b	h	Weight/pc. g	Type No.
1/2" = 13 mm	11	58	68.5	180	GSK 13-DR
3/4" = 19 mm	16	58	68.5	170	GSK 19-DR
1" = 25 mm	21	58	75	192	GSK 25-DR

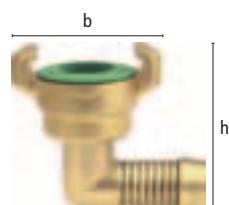

For hose clips type HS (☞ catalogue page 49 / 50), type ZOS (☞ catalogue page 48)
or crimping sockets type LPH (☞ catalogue page 52)

Original GEKA swivelling hose claw couplings with elbow stem, 360° axial swivelling

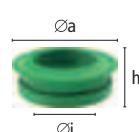

Hose i.D.	DN	b	h	Weight/pc. g	Type No.
1/2" = 13 mm	11	58	60	200	GSKW 13-DR

1" = 25 mm	20	58	86	270	GSSG 25
1 1/4" = 32 mm	27	58	96	340	GSSG 32

For hose clips type HS (☞ catalogue page 49 / 50), type ZOS (☞ catalogue page 48)
or crimping sockets type LPH (☞ catalogue page 52)
Thread types on request (GSSGA34 available from stock)

Original Rubber Ring with support ring of brass for MODY-Screwing Couplings of brass

Material	Colour	Shore h. A	Øi	Øa	h	Weight/pc. g		Type No.
NBR/MS	black	65°	21.5	33.5	7	6	10	GSGOR-Set

Original GEKA plus-Claw Couplings

of brass for water

- High quality couplings of forged brass MS 58
- Easy to couple, high pressure- and vakuum-spectrum
- Maximum bore at optimum wall thickness, safe and hose protecting stem profile
- Ergonomic formed claws, optimum security against accidental opening
- Patented special rubber ring of NBR with optimum elasticity
- **Universal coupling (interchangeable with world-wide used types) for water lines in industry, construction, garages, agriculture or civil installations**
- For applications with drinking water just replace standard rubber ring GKOR with rubber ring GKOR-KTW (☞ catalogue page 87)

Max. Working Pressure	Temperature	Material	Mat. Seal	Medium	Threads	Claw Distance	Box
PN 50 bar	up to +95°C	MS 58	NBR	water	ISO 228	40 mm	10

Safe and quick connections for temperature-regulation applications

Easy handling, safe and quick connection and disconnection, secure operation, robust and reliable for rapid installation and optimum process safety.

The new O-ring generation – much more resistant and long lasting

- ① Viton-O-Rings generally PTFE-(Teflon-) coated, thus much more resistant against a multitude of aggressive temperature-regulation media
- ② High resilience (no tearing) according to DIN 53504
- ③ High abrasion resistance of O-Ring according to DIN 54021
- ④ Agglutination of O-Ring with plug nipple is prevented at high-temperature applications
- ⑤ Noticeably increased durability of couplings
- ⑥ Special high performance sealing rings for special applications

(catalogue page 111)

New!

Technical Information:

- Quick Disconnect Coupling Systems DN 6, DN 9, DN 13 and tapered screwings (interchangeable with System Hasco Z 8 and DME).
- Depending on importance of full flow capacity or possible liquid loss while disconnecting with free passage, one-way or two-way shut off.
- For visual distinction of threads acc. to DIN 13 or ISO 228 all ISO 228 show a small shoulder.
- Optimum flow capacity at smallest dimensions.
- All couplings with viton-O-Ring-sealing PTFE coated (Up to max. 200°C – depends on medium and working pressure!).
- For permanent operation over 160°C the necessary type has to be clarified separately.
Special sealing ring (catalogue page 111)
- Plugs with inch-threads generally nickel plated for simple distinction
- Optional all coupling types can be equipped with the new disconnect protection (Information page 95).
- Colour coding systems (catalogue page 109)

Type:	→	Interchangeable with System:	Page

- Hose stems with profile for standard hoses or for quick fit hoses available (quick fit for types ESDM and ESD on request).
- Couplings with extra long sleeve for problem-free connecting of plugs counter-sunk in the mould.
- Sleeves on couplings with free passage nickel plated for easy distinction.
- Additional types, special sizes or sealing materials on request.
- All couplings with valve are generally suitable for connection with plugs with valve.
- Please note max. temperature of 100°C for quick-fit-hose applications.
- For problem-free connection of temperature-regulation lines as well as compressed air or vacuum lines.
- All coupling types with one-hand operation.

Materials

- Connections, Sleeve, Valve body, Valve: MS 58 (2.0401) resp. stainless steel (1.4305)
- Spring, Retaining Ring, Balls: Stainless Steel
- O-Rings: Viton (Teflon-PTFE coated)
- Plugs, Screwings, Combination parts: MS 58 (2.0401) resp. stainless steel (1.4305)

Whole range silicon-free!

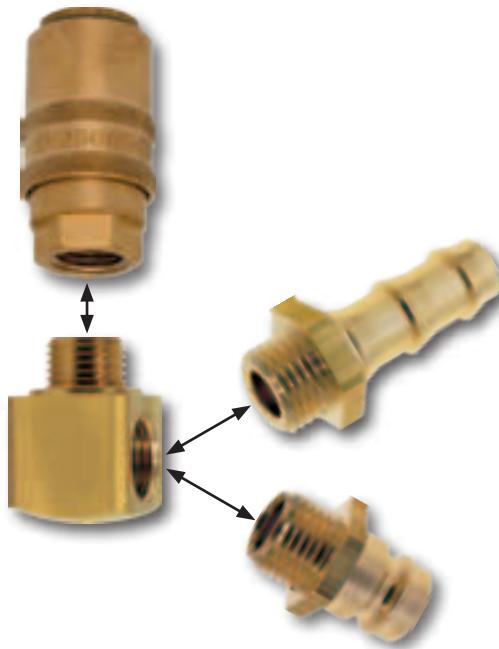

The anchor principle of the quick-fit hose stems

quick · safe · reliable

The module system

Just assemble according to your needs.

The anchor principle

Safest hose fit through
quick-fit stem profile

JUST SIMPLE!

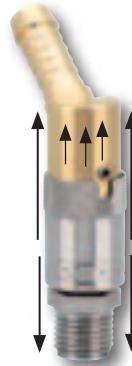

- No tools or hose clamps necessary to assemble the hose!
- The anchor principle guarantees safest hose fit without additional clamp assembly and provides an absolutely tight and secure connection of quick-fit hose and quick-fit coupling or -plug.
- The coloured marking-rings assure an easy and clear marking of same-coloured quick-fit hoses to distinguish different heating- or cooling circulations.
- Suitable quick-fit hoses (e.g. Parker Push-Lock or Gates Lock-on) are available at most hose distributors. On request we are pleased to help you.
- The module system allows various combination possibilities according to your needs. (© catalogue page 124–126)
- Special executions or other sizes/types on request.

The Disconnect Protection

Safety for man and machine

Easy and effective protection
against unintentional disconnection through
simply turning the coupling sleeve.

**Safety not only for
high-temperature applications**

The disconnect protection for all coupling types.

Available for all couplings against surcharge of
Euro 1.79 gross price

When ordering simply add on standard type no. "S"
(e.g. ESD 13 TLABS or ESHM 9 TLS).

- For the protection of man and environment against unintentional escape of temperature-regulation fluids.
- To avoid fluid- or pressure-loss in circulations during operation and therefore to secure running production and to avoid damages on mould and machine.

Disconnection only possible at exact fit of
the safety pin into sleeve slit.

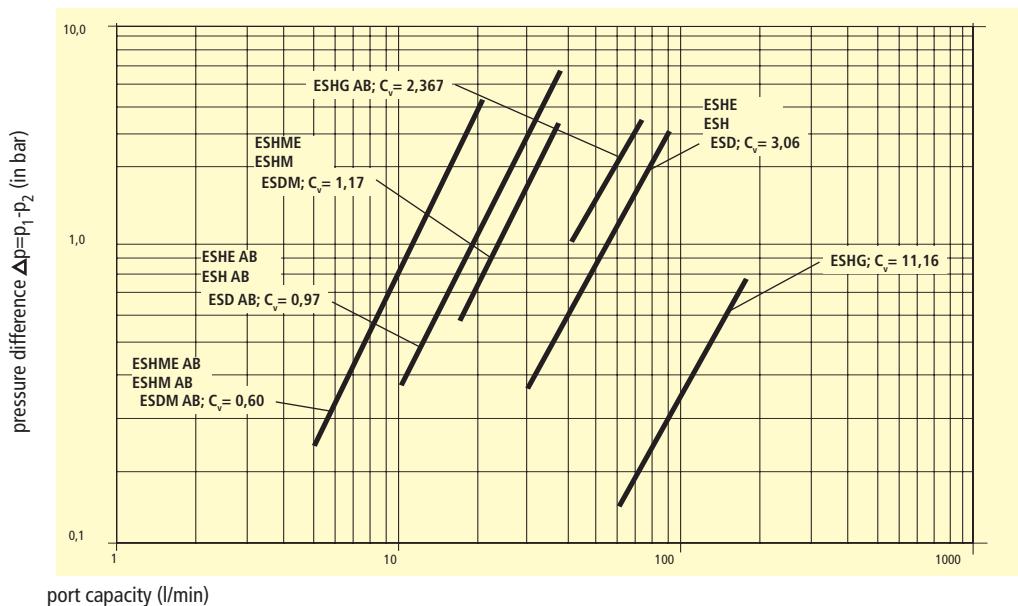

Other safety systems for disconnect
protection on request!

For special applications with temperatures up to 300 °C or with special aggressive temperature regulation oils we produce on basis of the stainless steel types ESHME DN 6 resp. ESHE DN 9 special coupling types with extremely reliable high-quality O-rings on request! (☞ catalogue page 111)

Port Capacity Diagram

LÜDECKE temperature-regulation quick couplings DN 6, 9 and 13

Performance diagram: medium water at 20°C, both couplings and plugs free passage resp. 2-way shut-off (AB)

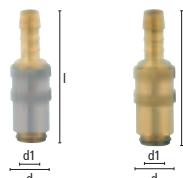

Temperature-regulation quick coupling system DN 2,7

Range ESHMC – plug size 5 mm – material brass 2.0401

New!

Interchangeable
with
Hasco Z 8

- For temperature regulation applications with hot or cold water resp. oil
- Optional with free passage, one-way or two-way shut-off
- Extra long sleeves for problem-free connection of plugs counter-sunk in the mould, angle-connections avoid the kinking of thin-walled hoses
- The new range DN 2,7 is especially suitable for the connection of temperature regulation lines on small tools in the plastics industry for the production of micro-parts

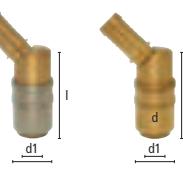

Materials

- Connections, sleeve, valve body, valve, plug: MS 58 (2.0401)
- Spring, retaining ring, balls: stainless steel
- O-Rings: Viton (PTFE-coated)
- Plugs: MS 58 (2.0401)

Distribution Unit System for temperature-regulation lines

made of aluminium (anodised)

- Blue and red anodised blocks for a clearly arranged composition of flow and reflux as close as possible to the moulding tool, for a direct assembly to the machine
- A central inflow from and outflow to the temperature-regulation tool, as many outlets as necessary to the moulding tool because of the modular construction and different lengths
- Aluminium profile can be extended or combined as often as desired due to the bar connector system
- Increases the working and production safety through its clearly arranged composition of temperature-regulation lines, saves energy and hose lines because of central inlet of the temperature-regulation medium into the machine
- Lateral inlet thread G 3/4", above outlet thread 1/4" for coupling series DN 6 and DN 9
- Other types / executions on request

New!

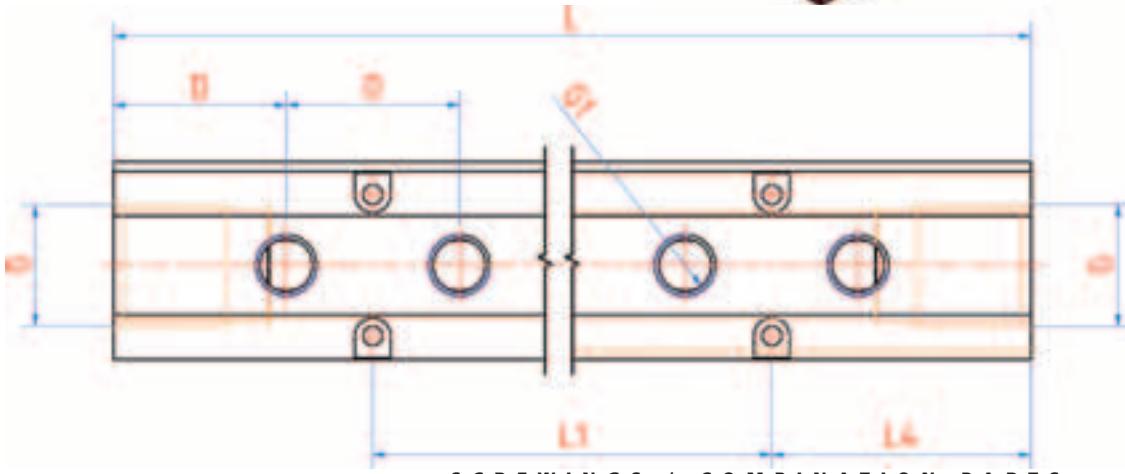

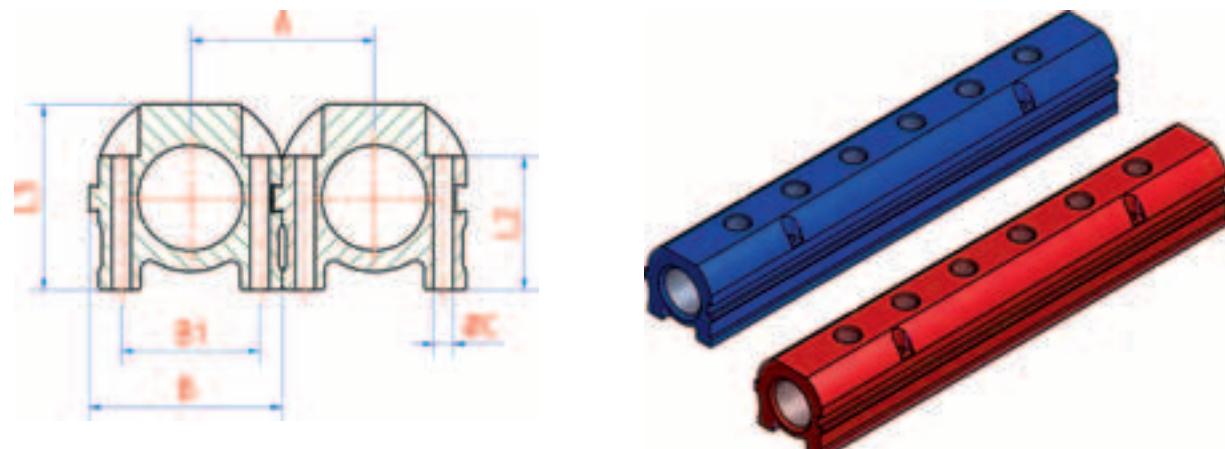

Max. work. pressure	Temperature	Material	Threads	Medium

Colour coding of couplings for flow and reflux

New!

For the easy distinction and identification of flow and reflux lines of the temperature regulation circuit the series ESHM, ESHME and ESH, ESHE can be ordered with a red resp. blue anodised aluminium ring as marking on the sleeve against a surcharge

Please pay attention to our minimum order quantity of 20 pcs./type.

Simply put the affix -R or -B at the end of our standard article numbers when ordering (e.g. ESHM 9 TLABR resp. ESHM 9 TLABB).

The aluminium rings can also be ordered as a spare part for self-assembly. Simply put the ring on the coupling sleeve!

Marking rings for temperature regulation couplings

For coupling type	Color	∅	Material	St. gew. g	Art.Nr.
ESHME, ESHM/DN6	red	17	Aluminium anodised	50	1
ESHME, ESHM/DN6	blue	17	Aluminium anodised	50	1
ESHE, ESH/DN9	red	22	Aluminium anodised	50	2
ESHE, ESH/DN9	blue	22	Aluminium anodised	50	2

For other coupling series also available on demand.

Swivelling couplings and plugs

New!

- Hose stem and male thread couplings of the series ESHM and ESH can be ordered optionally with a swivelling connection using a high-quality ball-and-socket joint with double o-ring sealing against a surcharge
- In case of an order simply put the affix -DR at the end of our standard article numbers (e.g. ESHM 9 TLABDR). Please pay attention to our minimum order quantity of 20 pcs./type.
- The swivel joint absorbs the pulling and rotary motion especially when opening and closing the tool in the machine. Thus a fast abrasion of the o-ring inside the coupling can be avoided through the permanent turning of the plug. Leaks in the temperature-regulation circuit are prevented in this way. Furthermore, the swivel joint helps the hoses of the tool not to kink.

For other coupling series also available on demand.

High-performance special gaskets for temperature-regulation couplings

New in our program: High-performance gaskets of Hitec-Viton and Hitec-EPDM for the coupling series ESHM, ESHME and ESH, ESHE against a surcharge of 2.76 gross/pc. Please pay attention to our minimum order quantity of 20 pcs./type.

New!

The HITEC®-FKM (Viton) o-ring features a high heat resistance until 200°C of permanent temperature and also a high resistance against synthetic oils, very good chemical resistance, resistant against aliphatic hydrocarbons (fuels)

180°C of permanent temperature and also a high resistance against hot water and steam
-also resistant to age and weather,
KTW approval for drinking water in Germany

The coupling sleeve is marked with a green anodised aluminium ring for an easy distinction towards standard couplings.
Simply put the affix -HV at the end of our standard article numbers when ordering (e.g. ESHM 9 TLABHV).

Attention: this ring is not resistant to mineral oil and grease!

The coupling sleeve is marked with a black anodised aluminium ring for an easy distinction towards standard couplings.
Simply put the affix -HE at the end of our standard article numbers when ordering (e.g. ESHM 9 TLABHE).

The HITEC®-EPDM o-ring features a high heat resistance until

For other coupling series also available on demand.

Temperature-regulation quick coupling system DN 6

Range ESHME – plug size 9 mm – material stainless steel 1.4305

- For temperature-regulation applications with hot or cold water resp. oil e.g. in clean room production
- Optional with free passage, one-way or two-way shut-off
- All couplings available with disconnect-protection against surcharge (just add „S“ on Type No.)!
- Detailed Information (catalogue page 93)

Materials

- Connections, sleeve, valve body, valve, plug: stainless steel 1.4305
- Spring, retaining ring, balls: stainless steel
- O-Rings: Viton (PTFE-coated)

- 140 Distributors for Quick Disconnect Couplings
- 141 Standard-Quick Disonnect Couplings DN 7,2
with free passage
- 142 Standard-Quick Disonnect Couplings DN 7,2
with two-way shut-off
- 144 Quick Disconnect Couplings DN 7,2
and DN 7,8 with disconnect protection

For quick, easy to handle and safe connection of tools or hoses for compressed air and other fluids quick disconnect couplings in different dimensions (according to requirements) are used.

This system consists of coupling and plug, where all connections in one dimensional system are interchangeable. Simple pulling-in of the plug connects, removing of the plug by pulling the coupling sleeve back (with automatic locking of the coupling).

Micro Quick-Disconnect Couplings DN 2,7

one-way shut-off

- New!**
- High quality couplings with smallest dimensions of brass nickel plated
 - On request also available with red or blue anodised aluminium sleeve
 - Multiple applications in pneumatic-, measure-, control- and regulation technique

Plug profile original size

Materials

- Connections, Sleeve, Valve body, Valve: MS 58 nickel plated, ball holder: chemically nickel-plated
- Spring, Retaining ring, Balls: stainless steel
- O-Rings: Perbunan
- Plugs: MS 58 nickel plated

Mini Quick-Disconnect Couplings DN 5

one-way shut-off

- Miniatur Couplings with small dimensions of brass blank or nickel plated
- Other sealing material on request
- Multiple applications in pneumatic, compressed air lines, measure-, control- and regulation technique

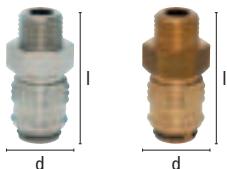

Materials

- Connections, Sleeve, Valve body, Valve: MS 58 resp. M58 nickel-plated
- Spring, Retaining ring, Balls: stainless steel
- O-Rings: Perbunan
- Plugs: MS 58 resp. steel zinc plated and yellow passivated (free of chrome VI)
- Coloured and anodised aluminium sleeves on request

automatic air-relief of the hose line available on request!**

Mini-Quick Disconnect Couplings DN 5

with plug and colour codification

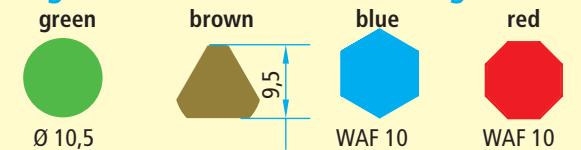

- Mini Quick-Disconnect Couplings of brass MS 58
- For the optical distinction of different medium circulations with coloured and anodised aluminium sleeve on the coupling and coloured and anodised aluminium ring on the plug
- For the absolute avoidance of wrong coupling operations when using different mediums with supplementary plug codification. Only the same-coloured couplings and plugs can be connected.

New!

Materials

- Connections, valve body, valve: brass MS 58
- Sleeve: aluminium anodised
- Springs, retaining rings, balls: stainless steel
- O-Rings: Perbunan, others on request
- Plugs: brass MS 58 with anodised aluminium ring

Plug and colour codification in original size

Mini Quick-Disconnect Couplings DN 5

two-way shut-off

New!

- Mini Quick-Disconnect Couplings of brass MS 58
- 2-way shut-off to avoid the escape of medium when disconnecting. Robust, safe and reliable
- Attention: Couplings can be connected with non-shut-off plugs DN 5, but shut-off plugs cannot be connected with standard couplings DN 5!
- Several fields of application, above all for liquid mediums in construction, control technology switchboard cooling etc.

Materials

- Connections, Sleeves, Valve body, Valves, Plugs: brass MS 58
- Spring, Retaining rings, Balls: stainless steel
- O-Rings: Perbunan

Extra charge for sealing rings of: EPDM 0.33 Euro, Viton 0.78 Euro

Special executions on request.

Flow-Capacity Diagram **LÜDECKE** Quick-Disconnect Couplings one-way shut-off

Performance Diagram: Medium Compressed Air at 6 bar (one way shut-off)

Port capacity (Nm³/h) (0°C, 1013.25 mbar)

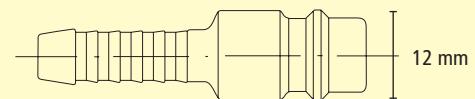

Industry Universal Quick-Disconnect Couplings DN 7,8

- High quality, extreme robust couplings with optimum sealing
- High flow capacity at low pressure drop because of stream favourable valve
- Special executions (☞ catalogue page 157) on request
- For compressed air lines in industry or garages, especially recommended directly at compressed air tools
- Universal principle – also interchangeable with plug profile ESA DN 5, ESO DN 5,5, ES DN7,2, ESPN DN 7,4 a.o.

New Execution!

Materials

- Connections, Valve body: MS 58 nickel plated
- Sleeve: Hardened steel nickel plated
- O-Rings: Perbunan
- Springs, Retaining ring, balls: stainless steel
- Plugs: Hardened steel nickel plated

Safety Air-Relief Couplings DN 7,4

with push-the-button-principle

New!

- Automatic Disconnection in relation to rest pressure guarantees absolute safety
- High quality, robust Quick Disconnect Couplings with optimum sealing
- New locking-system, extremely easy to connect and disconnect (only 1 button push necessary)
- Lightweight because of plastic compound material – no scratching of sensitive surfaces
- Safety-air relief function: air relief with 1 button-push, automatic safe disconnection of the coupling without pressure.
- Connecting similar to all standard quick disconnect couplings • No electrostatic charging
- Interchangeable with the "Euro-Profile" DN 7,2 resp. DN 7,8
- To avoid safe the "whip lash-effect" with easy operation

Materials

- Connections: steel zinc plated
- Complete housing: plastic compound material
- Seals: O-Ring Nitril
- Balls, Pins: stainless steel

MaxFlow Quick-Disconnect Couplings DN 19

- High-quality, extreme robust Quick-Disconnect Couplings for compressed air and liquid mediums
- Highest flow rate at a low pressure drop rate for large tools resp. for applications with high-volume flow rate in connection with a shut-off function by one-hand operation
- Special executions, e. g. sealing rings of Viton or EPDM for aggressive medium on request (☞ catalogue page 157)
- Couplings also suitable for plugs with valve, these plugs are available on request
- For compressed air supply in industry or construction at extraction points with extremely high demand of compressed air for high performance tools or for applications with different fluids

Special executions

- Brass nickel plated
- Coloured sleeves
- Special connections (e.g. bulkhead-screwings)
- Special dimensions, other materials
- Seals for different fluids (e.g. EPDM, Viton)
- Without valve, 2-way shut-off
- Oil- and grease-free execution
- Different types of disconnect protections

Available on request against specification, sample or drawing.

Blow-off Guns and Valves

For thorough and fast cleaning or drying of parts and working places in industry or garages compressed air guns or valves are used.

According to requirements under robust conditions aluminium- or brass guns and valves are used, for sensitive surfaces plastic guns are recommended to avoid scratching.

Various types of nozzles offer the right dosage, the required air volume, the necessary noise reduction or the directed security.

For flexible use a combination with MODY-spiral hoses is recommended.

MODY-Spiral Hoses

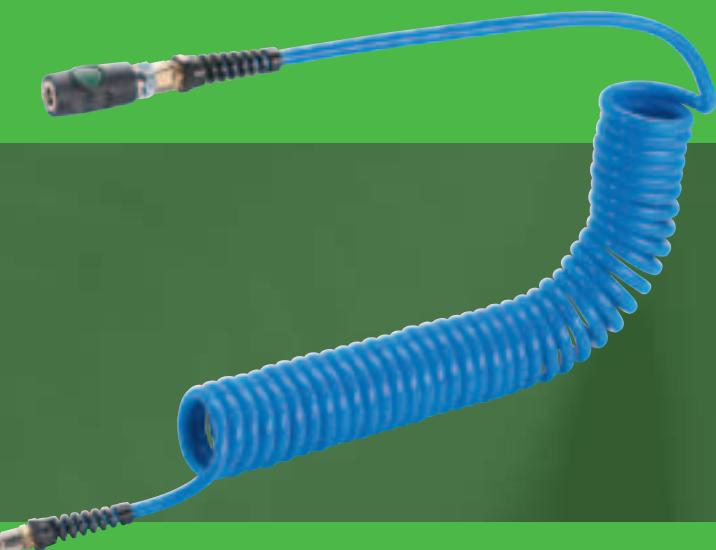

As a result of its excellent material characteristics, polyurethane spiral hoses remove more and more conventional polyamid-spirals for flexible compressed air supply. Also after worst deformation the Mody spiral hose goes back into its original shape, the flow capacity is permanently kept.

High quality, reusable and swivelling fittings with bend-protecting spring are absolutely essential for security and durability.

Hoses lying on the floor are always a risk for stumbling, the spiral hose contributes enormously to safety at work.

It is ideal to install the spiral hose at working places coming from the top.

- High abrasion-, pressure- and wear resistance
- Extreme and constant recoil of the spiral, small coil diameter
- Perfect elasticity, flexibility and bend stability
- Softener- and metal free
- Absolutely silicon-free; recyclable
- Exactly adapted assortment of reusable connections
- Space-saving despite of enormous reach
- Clean, safe and easy to store in individual packing
- Application: On air tools, assembly lines. In pneumatic, automation, reassuring- and control technique, car industry, instrument making, mechanical engineering, garages a. s. o.
- Also suitable for other fluids (on request).

- Polyurethane hoses (not spiralled) (© catalogue page 171)

Hose i.D./o.D. 4/6; 5/8; 6.5/10 with new polyurethane composition for more flexibility
at best pressure- and temperature characteristics!

New!

- For bigger demand other colours, hose dimensions, hose lengths and spiral diameters - according to your specifications - are possible without problems.
- If our standard program doesn't meet your requirements, you can have your own combination of a hose without fittings completed with fittings according to page 170/171. The fittings can be added to the hose resp. can be assembled from 10 pcs./type onward in our house.
We can't give any guarantee for hoses with fittings not assembled by ourselves.
- Please also note our system supplementions (complete program of Quick Disconnect Couplings • catalogue page 128–157, pneumatic Fittings • catalogue page 172–178 or Air Guns • catalogue page 158–163).

MODY-Duo-Spiral Hoses of Polyurethane

both sides with straight ends

- All advantages of the MODY-spiral hose
- Easy assembling with swivelling fittings on both sides
- Application: In fluid-control, on measuring devices, automation..., for different fluids or different compressed air lines combined...

A : S : S Antistatic Spiral Hoses of Polyurethane

both sides with straight ends

New!

- All advantages of the MODY spiral hose
- Suitable for explosion proof areas according to guideline 94/9/EG (ATEX)
- Avoids static loadings, surface resistance $\leq 10^6 \Omega$
- Outside calibrated, suitable for push-in fittings
- Microbes-, hydrolysis- and UV-resistant
- Can be used for vacuum applications, too
- To be used for the production of electronic parts, in surface treatment industry, in mining and tunneling, for parts transport or assortment

Flamex-Spark protecting and hot water Spiral Hoses of Polyurethane

both sides with straight ends

- Spiral hoses of special polyurethane, high quality and extreme robust, resistant against sparks and welding (sparks run down)
- All advantages of the MODY-Spiral Hose
- Fluoride-, halogen-, silicon-free
- Outside calibrated
- Extremely burn resistant, burn classification according to UL 94 =VO
- Long-living and reliable
- **Application:** For compressed air and water supply under extreme conditions in industry (e.g. on welding robots), in garages near welding places, plastic injection machines, public buildings, trains, machine building

MODY-Spiral Hose Fittings

of brass resp. steel nickel plated with polyamid bend- and scratch protective spring

- All fittings removable and reusable
- Maximum bore for maximum flow-capacity
- Exactly adapted to PU-dimension and hardness
- New construction, extreme pull- and pressure-resistant
- Male threads tapered and Loctite-laminated
- Quick Disconnect Couplings Standard System DN 7,2
- Swivelling screwings with double O-ring sealing and circlip, easy to turn under pressure
- All fittings also available with spring of steel on request (also for PA-Hoses)

Special productions and new developed products

As a result of our flexible CIM (computer-integrated-manufacturing) production from drawing on Auto-CAD to production survey and product examination with SPC (Statistical process control), **LUDECKE** is the ideal partner for quick and economic special solutions on various application fields.

For our customers around the world we develop and produce fittings made of different materials for various applications. Necessary tests (e.g. Burst pressure, temperature) can also be made by our technical department in most cases.

Our speciality is the development and testing of fittings and hose assembly methods of new developed hoses for different fluids and applications. Through practicing for decades and cooperating with leading hose manufacturers we created in this field a huge know-how to be able to provide ideal adapted and safe solutions quick and flexible.

Of course we also produce all kinds of turned parts according to your drawing or sample.

Necessary data for new developments or special productions:

Which material? _____

Which medium? _____

Which working pressure? _____

Which working temperature? _____

Necessary flow-capacity? _____

Connection Thread Hose stem

Which thread type? _____

Which hose material? _____

Which thread size? _____

Which hose i.D./o.D.? _____

Preferred assembly method? _____

Hose sample available? Yes No

Which environmental conditions? _____

Necessary tests or test certificates? _____

Quantity involved? _____

Sample or drawing available? _____

Use as form: Please copy!

Materials

For our products we use the following materials:

1. White malleable Iron according to DIN EN 1562 (EN-GJMW-400-5)

This iron carbon is getting its characteristical qualities through a special heat treatment and not, like other materials, through its chemical consistence. Through this heat treatment all carbon is removed up to some mm depth from the surface. Thin walled parts get the structure of ferritic steels. This possibility to create complicated casted geometrical structures in combination with the high quality technical features of this iron (excellent for welding, forming and forging) makes white malleable iron to a flexible and exacting partner.

The toughness of white malleable iron avoids a breaking of the material through heavy strain. A hose coupling overdriven by a truck will never break, it only gets oval. Through high expansion limits white malleable iron is suitable to be used at high temperatures, but also up to -60°C, because its firmness qualities improve with declining temperature.

Moreover malleable iron is easy to machine, has an excellent resistance against environmental influences and can be hardened with thermochemical processes.

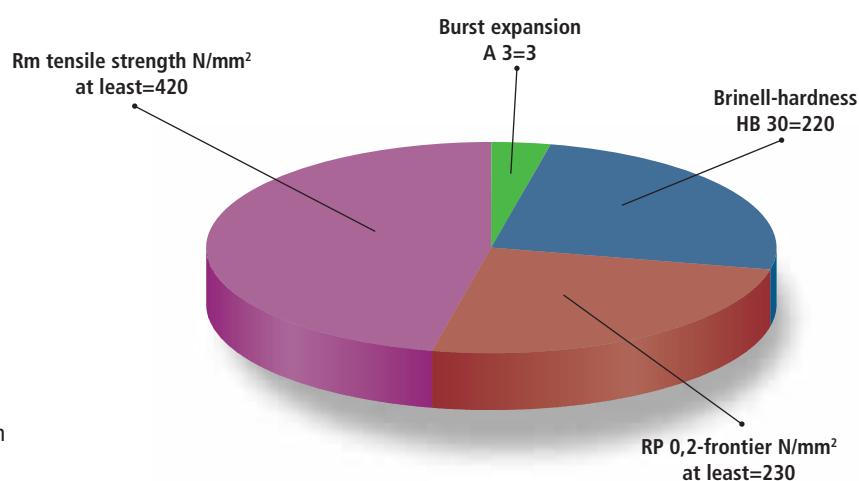

White malleable iron guarantees us a constantly high quality. As raw material for the production of fittings **LUDECKE** only uses castings made in German and European foundries.

2. Brass MS 58 /CuZn 39 Pb3), Material 2.0401

Brass MS 58 is the mainly used alloy for all machining production procedures. It guarantees high durability, can be galvanized excellent (nickel plating) and is as a result of its material characteristics extremely well suitable for all turned parts. For its production **LUDECKE** uses MS 58 in different profiles (Hexagon-, round-, pipe-profiles) or warm forged raw parts.

3. Free-cutting steel (11s Mn Pb 30), Material 1.0718 according to DIN EN 10087

Good machining quality is the requirement for an economical production of turned parts with high precision and excellent surface quality. The material 1.0718 fulfills these characteristics. The possibility to weld, harden and for surface treatments is also guaranteed.

Characteristics of malleable iron
(EN GJMW-400-5)

4. Stainless Steel, Material 1.4401 (ANSI # 316) and 1.4305

Rust- and acid-resistance, excellent mechanical qualities and high durability at good machining qualities make this material the ideal partner for high quality fittings to be used under extreme conditions with aggressive fluids or for food and drinking water applications.

Chemical composition:

Carbon	< 0.08	Manganese	< 1.5
Silicon	< 1.5	Nickel	9 -12
Sulphur	< 0.04	Chrome	18 -21
Phosphorus	<=0.04	Molybdenum	2-3

5. Aluminium

The alloy Al Mg Si 1 F 31 can be hardened and is excellent resistant against corrosion. It can be polished, is resistant against chemical fluids and is well suitable for machining.

This alloy is used by **LUDECKE** for forged parts. As profile material the alloy Al Cu Mg Pb F38 is machined.

6. ECOBRASS®. (UNS C 69300) New!

ECOBRASS® is a new innovative material that combines the machining advantages of brass with hardness and resistance characteristics of stainless steel. ECOBRASS® is extraordinarily corrosion-resistant, free of lead and toxic compounds (fulfils coming restrictions of the car industry) and keeps its shining colour long lasting. ECOBRASS® is certified for drinking water applications. It is only slightly more expensive than brass MS 58, exhibits however an important price advantage in regard to stainless steel. **LUDECKE** machines ECOBRASS® as special alloy on request.

New!

RoHs-Directive

RoHs-conformity

Exclusion of dangerous substances – EU directive 2002 / 95 / EG, 2003/11/EG and 2005 / 618 / EG (RoHs)

In order to adhere to this directive our galvanic equipment has been changed to chrome-VI-free zinc plating.

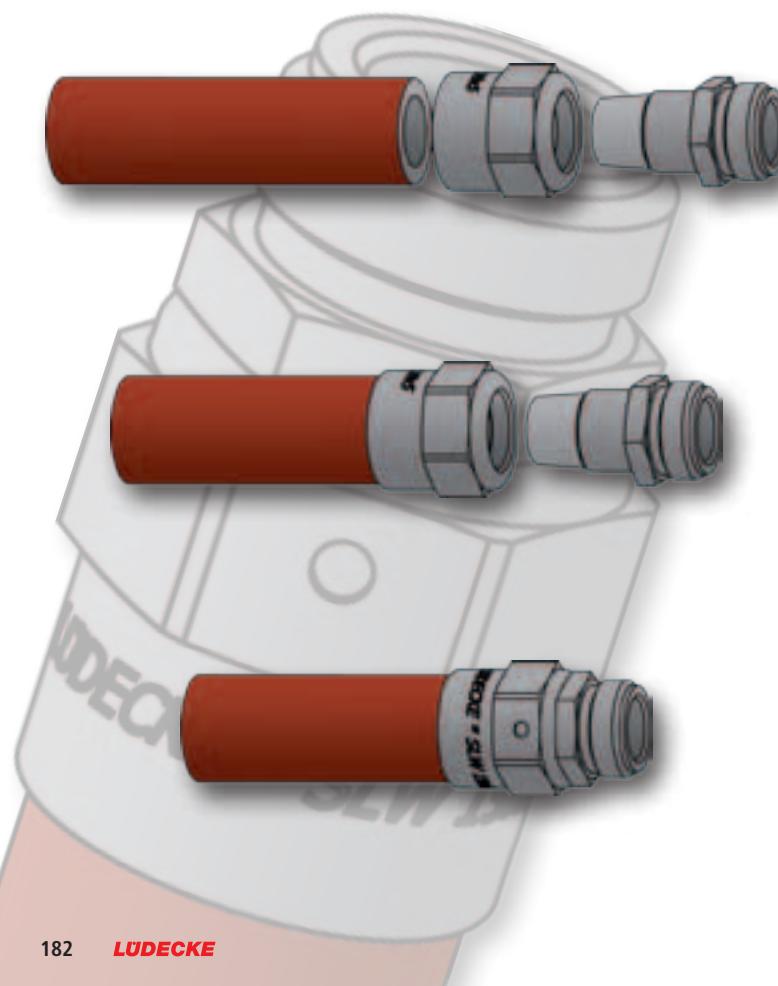

It is to be emphasised that we will keep on supplying our steel and malleable-iron articles yellow-coloured because the formerly yellow chromising containing chrome VI has been replaced by a high-grade chrome-VI-free yellow passivation.

In the future our steel and malleable-iron products will not change their look as demanded by our customers, the RoHs directive will be adhered to and the quality of our coupling systems "Made in Germany" will be improved once more due to this high-grade surface treatment.

The compliance with all other standards of the RoHs directive is also guaranteed regarding our suppliers of semi-finished goods and all internal production proceedings.

Hose Assembly With Thread Ferrules DIN EN 14 424

1. The fitting must be clamped in a vice.
2. Put the ferrule over the straight-cut hose (pay attention to the correct hose dimensions!)
3. Move the hose with ferrule over the stem up to the thread (use lubricant if necessary).
4. Control the correct hose fit by means of the sight bore in the ferrule.
5. Screw the ferrule with the aid of a spanner on the fitting's thread until you reach the limit.
6. Control once again the correct hose fit by means of the sight bore.
7. The thread ferrule is unlockable and reusable at any time.

Having a look at air:

Situated on Amberg's prettiest square, the historic "Klösterl" ("little convent") complex dating from the 14th century with the fitting epithet "Engelsburg" ("angel's castle") offers unique showroom space on three levels (650 square meters) dedicated to the subject air ...

Air can be experienced and comprehended.

The AIR MUSEUM shows the "airparc" (on loan from Festo AG & Co. KG, designed and constructed in 2004 by Wilhelm Koch, Oskar Lottner, Andreas Schönberger) – all grey painted large objects.

Technical exhibits

LÜDECKE pneumatic couplings with the "pneumatic pinball machine", GRAMMER AG – pneumatic, air-conditioned seats, HERDING filter systems, GRAMMER Solar – hot air collectors, Carcoo air garage, Via Sports airboard, Ralf G. Augenstein fan collection ...

Objects on loan and pictures by artists, architects and designers

E. g., Hans Hemmer / Berlin – balloon chapel and video, Res Ingold / Munich airship, Ralf Homann "On Air", Luft&Laune, Architects of Air, Dreamsphere, Frank Fiercke, HARUKO, Wilhelm Koch – former Gummeum collection "Squaring of the Tube", Vesuna tower model, pneumatic bicycle, air climbing stairs, inflated artist, thick and thin air, air pressure wave, vacuum blower, Zanotta air seat ...

Apart from exhibitions there are talks, readings, guided tours and concerts. On the ground floor there are changing exhibitions on design, architecture, art, technology and everyday art.

The AIR MUSEUM was founded as a private initiative at the beginning of 2006 and is financed by donations and air helpers without any public funding.

1 = high resistant

2 = resistant

3 = limited resistant

4 = inconsistant

- = not yet tested

General Markings

This table of resistance shall only be the line of direction. It cannot be regarded to be fully complete or absolutely correct. The measures are obtained from experiences. Due to different applications and mixing of the mediums there may occur possible differences.

The Mediums of Tightening and their Qualities

Perbunan

(Nitrilcaoutschouc) NBR

Perbunan is of high resistance against oil, small concentrated solvents and many other mediums. Because of its high tightness it is also very suitable for gasvolumed fluids.

Perbunan may be used at temperatures between 253 K and 373 K (-20°C and +100°C).

It may not be used for some different types of hard-flamable hydraulic fluids.

PTFE (Teflon)

(Polytetrafluorethylen)

PTFE is resistant against even all fluids, independent if it is solvents, lyes, acids or other fluids or gas.

It has excellent qualities of glide and is suitable for a great range of temperature from 173 K up to 473 K (-100°C to +200°C).

When being used in the high pressure area it is not recommended for more than 100 bar.

Viton®

(Fluorelastomer/FPM)

Viton is resistant against oils, fuels, solvents, acids and other aggressive fluids. The very good weather resistance is to emphasize.

Dependent on purpose, Viton may be used at temperatures from 243 K up to 473 K (-30°C to + 200°C).

EPDM

(Ethylen-Propylen-Terpolymer)

Also known as APTK. EPDM is extremely resistant against light, ozone, weather and ageing. Can be recommended for use with acids (acc. to concentration), alkali, water, alcohol and ketone.

Temperature range from -50°C to +130°C.

Hypalon®

(Chlorsulfonyl-Polyethylen-Caoutschouc/CSM)

Elastic rubber with excellent resistance against all kinds of weather influences and extreme resistance against oxidizing chemicals, heat and rub off.

Temperature range from -40°C to +160°C.

Hasil 70

(silicon modified EPDM-Terpolymerisat)

High mechanical bearing at low and high pressure. Thermic pattern of a Silicon-rubber-quality. Excellent weather- and steam-resistance at low pressure deformation.

To be used up to +195°C working temperature, +200°C short maximum temperature.

Shore hardness according to DIN 53505 A

28°	to	38°	-	very soft
40°	to	50°	-	soft
52°	to	66°	-	middle soft
68°	to	78°	-	middle hard
80°	to	90°	-	hard
92°	to	100°	-	very hard

Viton® and Hypalon® are products of DuPont Dow Elastomers.

Technical Tables

Threads

Our fittings are equipped with the following threads:

Whitworth pipe Threads according to ISO 228, DIN 2999

Coarse Threads according to DIN 405

NPT-Threads according to ASA B2.1

Metric Threads according to DIN 13

Parallel Threads Rp. according to ISO 7/1

CERTIFICATE

The Certification Body
 of TÜV SÜD Management Service GmbH
 certifies that

LÜDECKE

E.Georg Lüdecke Armaturen GmbH
 Heinrich-Hauck-Straße 2
 D-92224 Amberg

has established and applies
 a Quality Management System for

Development, Production and Distribution of
 Fittings and Spiral Hoses

An audit was performed, Report No. 70003736
 Proof has been furnished that the requirements
 according to

ISO 9001:2008

are fulfilled. The certificate is valid until 2012-08-02
 Certificate Registration No. 12 100 5637 TMS

Munich, 2009-08-20

LUDECKE - on the road through Europe

Since the beginning of April 2009 the new **LUDECKE** show truck for the international forwarding company Stahl has been rolling over Europe's main traffic routes and has been drawing the attention on itself everywhere. Designed in airbrush technique by the airbrush world champion Jürgen Fieber from Amberg, the latest generation Volvo truck has become a real feast for the eyes. The truck is also available as a collector model in a limited edition. Furthermore it can be seen in the famous miniature train scenery of the district „Speicherstadt“ in Hamburg and the original will most probably have a live appearance soon on the German television at „Wetten dass?“ („You bet!“).
