

PNEUMATIC TABLE FOR NAILING PALLETS

pneumatico PT-1900

adjustable for various sizes

PNEUMATIC TABLE FOR NAILING PALLETS **pneumatico** PT-1900

(possible viability of PT-2300, PT-2800, PT-3300)

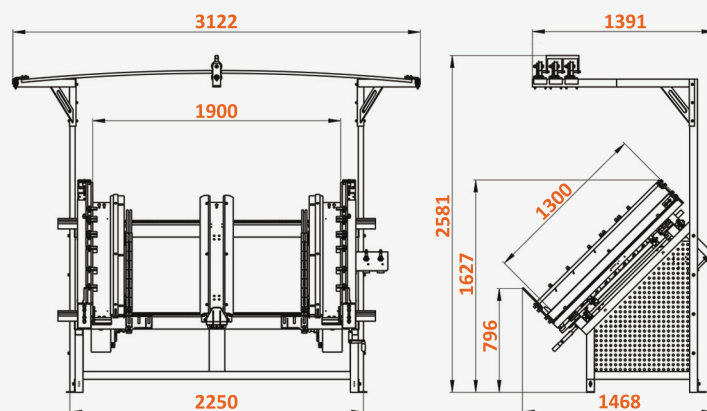

Table Pneumatico **PT-1900** is a universal machine for hand nailing of various wood pallets. Its top part contains a frame equipped with mobile carts for balancers, where the nailers are hung. Pneumatico **PT-1900** assures easiness and work study. It guarantees the increase of effectiveness and saves the space (it takes up 4 m²). What is more, it saves the costs of pattern preparation for various pallets.

During traditional nailing two workers produce about 250 pallets on one shift. During the same time 210-230 pallets can be produced by one individual worker when Pneumatico PT-1900 table is used.

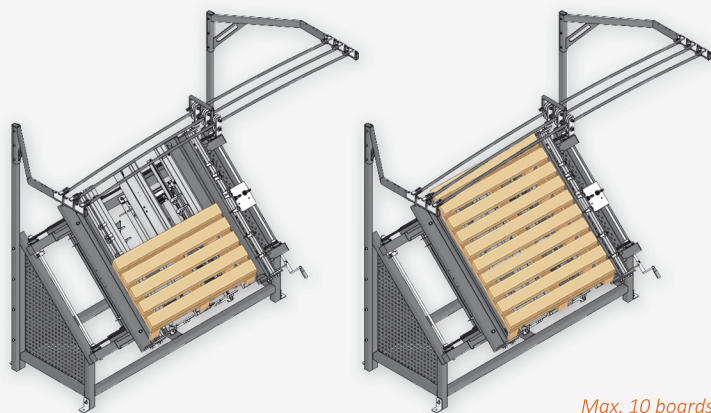

Pneumatico PT-1900 table:

- assures work efficiency;
- plays the role of an adjustable pattern for EUR pallets on 2,3 or 4 bearers;
- designed for worker's individual use;
- gives the possibility of easy readjustment from one size to another;
- holds the pneumatic function of clamping the bearers and lifting the ready-made pallet;
- assures the work study by the system of hanging nailers on balancers.
