GROUP

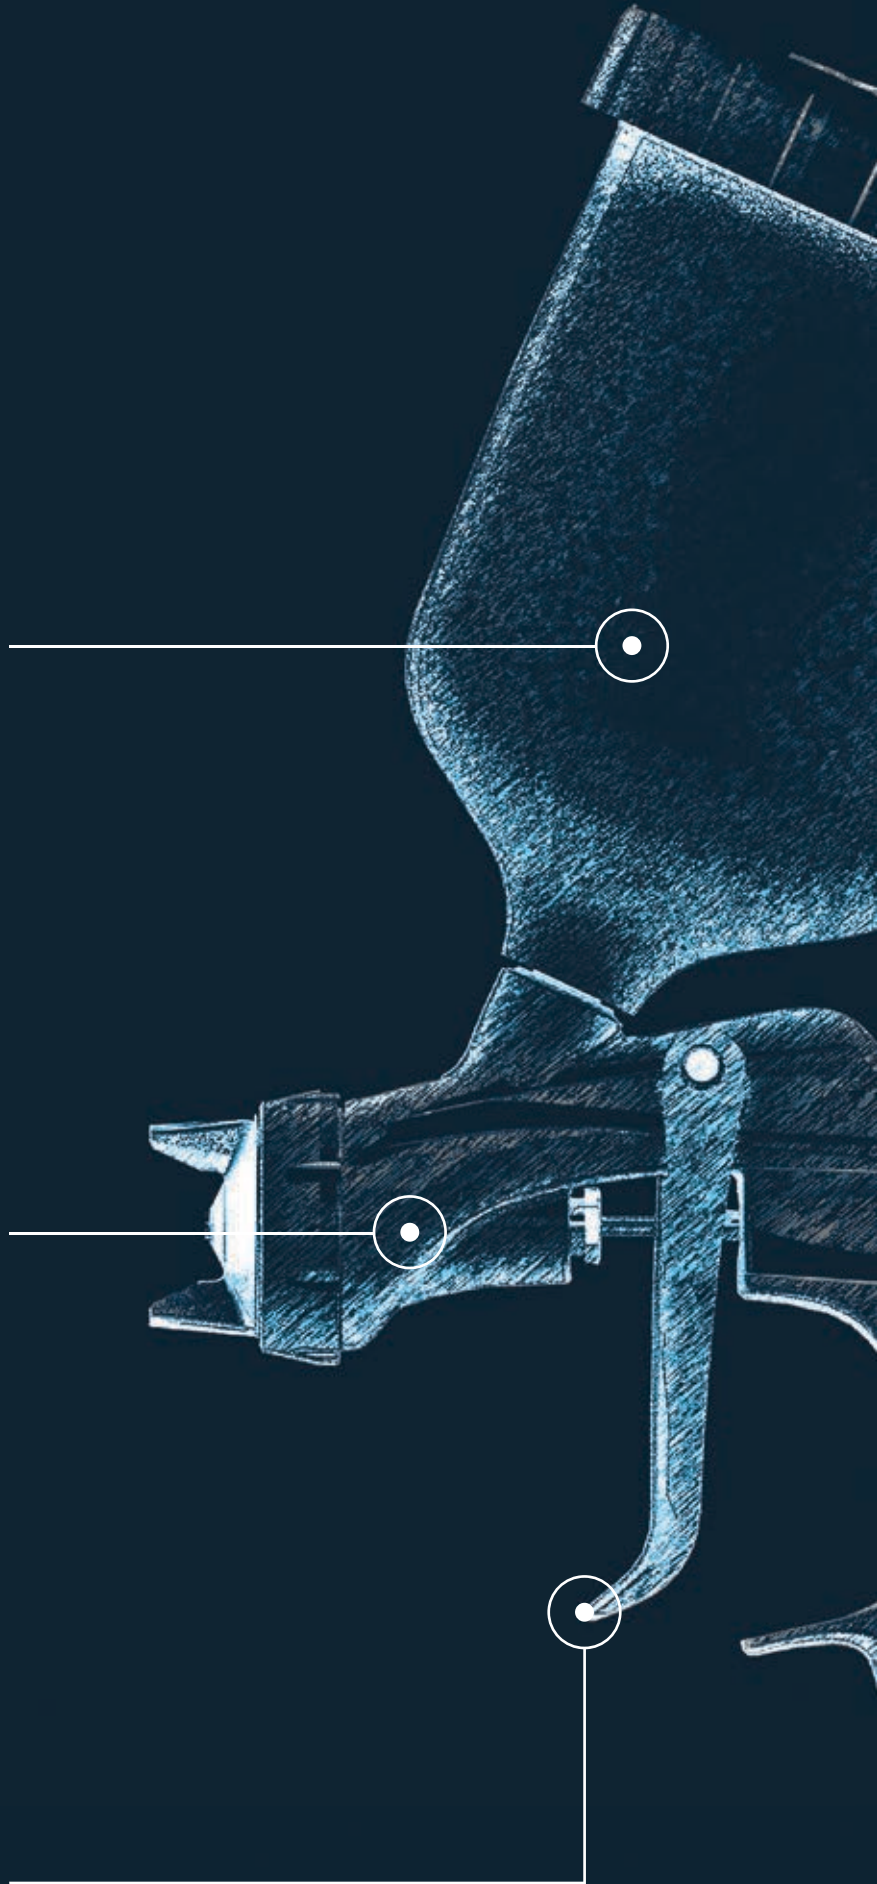

Anest Iwata carries more than 90 years-experience in the coating industry, combining the most sophisticated Japanese craftsmanship tradition to the continuous search for leading-edge technology.

PASSION & PERFORMANCE

As a global group we aim to deliver the most technically advanced spraying equipment on the market.

When designing our products we think about highly professional and creative individual who have passion for painting and are looking for the greatest performance.

With this in mind we always try to reach for the highest standards of sophistication, creativity and technical realization.

BEYOND **any** BOUNDARY

A WIDE RANGE

Our range of products varies from several spray guns lines, pumps and painting accessories, projected ad hoc for different paint application and to satisfy the customer in his research for the best solution.

CUSTOMER ORIENTED

The automotive refinish, together with the industrial and the wood sector are only few of the areas in which the Anest Iwata experience has found its appreciation between the users, not only for the excellence of our tools, but also for the attentive service our customers can count on.

Anest Iwata effort in providing the best results in performance is also conceived for the optimization of the resources and materials in the optic of begin environmental-friendly.

SPRAY GUNS & ACCESSORIES

for **A R** REFINISH

Whether it's a first installation, a self-repair or a small retouch (spot repair) **Anest Iwata** has always been the point of reference for professional painters. The experience in the development of varnishing guns for the automotive sector has strengthened its image over time.

MANUAL SPRAY GUN

CLEARCOAT

WS-400 EvoClear

PREMIUM QUALITY

FEATURES

- Perfect surfaces thanks to the Split Nozzle™ technology
- High fluid transfer by a large and uniform spray pattern
- Very fine atomization
- VOC-compliant professional spray gun (more than 65% transfer efficiency)
- Clearly visible reduction of "fat edges"
- Low background noise
- Lightweight spray gun body
- Simple adjustment of the control knobs, both for right and left handers
- Conical seal nozzle, minimum wear parts
- Clearer design, easy maintenance
- Quality surface for easy cleaning

W-400WB2 ClassicPlus

HIGH QUALITY

FEATURES

- Perfect surfaces thanks to the Split Nozzle™ technology
- VOC-compliant professional spray gun (more than 65% transfer efficiency)
- Very fine atomization
- Ideal for blending
- Low background noise
- 380 g: one of the most lightweight spray guns on the market
- Conical seal nozzle, minimum wear parts
- Quality surface for easy cleaning
- Clearer design, easy maintenance

- Cleaning Brushes - Universal Spanner
- PRO KIT - with 200 ml CUP
- W-300 WB Spray Gun
- PCG 2P-2 CUP - 200ml
- Cleaning Brushes - Universal Spanner

FEATURES

- Perfect surfaces thanks to the Split Nozzle™ technology
- Specific for blending, for example for side walls, bumper and smaller areas
- Barely visible transitions thanks to the soft and fine spray pattern
- Very fine atomization with low air consumption (190 l/min)
- Extremely low material consumption
- Low background noise
- 320 g: one of the most lightweight Smart Repair spray guns on the market
- Simple operation of the control knobs, for right and left handers
- Conical seal nozzle, minimum wear parts
- Clearer design, easy maintenance
- Quality surface for easy cleaning

W-300WB UV Cured Paints

THE W-300 WB UV IS THE LATEST ADDITION TO OUR W-300 SERIES

As the W-300 series is already known for its superior atomization, we have added some very specific features to our 1.2 nozzle size to make it a dedicated specialist for UV paint application. It comes with a black colored 200 ml cup that prevents UV ray exposition of the paint and for extra convenience we have added an Air Cap Cover to protect the area around the nozzle. This prevents remaining paint on the nozzle or air cap from curing while the spray gun is not in use, making it's usage and cleaning as effortless as possible. Although the black cup characterizes the visual appearance of the spray gun already we have added several other black details and an additional engraving to make recognizing it even easier.

FEATURES

- Specific for UV cured paints
- Black UV Paint Cup: 200 ml
- Black Air Cap Cover to prevent paint from drying
- A very fine atomization even at a low air inlet pressure
- Higher-transfer efficiency
- Lower air consumption & less overspray
- The spray pattern is large, uniform, flat, soft

SPOT & SMART REPAIR

AZ4 HTE-S Impact Junior

STANDARD QUALITY

This version has been designed to achieve those small and medium repairs on a vehicle body, which can be perfectly repaired thanks to the high transfer-efficiency and the more control that this spray gun grants, together with the maximum comfort for the operator. Ideal for both water and solvent based paints, it is provided with an adjustable inlet valve and it is available both with a 200 ml or a 70 ml cup.

FEATURES

- Flat and even fan pattern: excellent colour reproduction and mottle free control
- Low pressure properties: atomizes at low pressures to keep repair small
- Double tapered seat nozzle system: nozzle thread has no contact with paint so it is easy to keep clean
- PTFE coated black gun body: appealing design and ease of cleaning and maintenance
- Ergonomic design redesigned for maximum balance and comfort
- Smooth trigger action: perfect spot repair control
- Most parts interchangeable with AZ3 HTE2: cost saving on spares

PRESSURE SPRAY GUN

COMMERCIAL VEHICLE

PRESSURE SPRAY GUN SERIES

With WS-200 series, ANEST IWATA is launching a completely new generation of pressure spray guns. This series redefined the expectations of the most demanding users in the most diverse application fields. Every single aspect of WS-200 pressure spray guns has been redesigned. The result is now the market launch of the best pressure spray guns ever made. Available in two different versions: • WS-200SP: with newest generation of Pre Atomization Technology (Split nozzle) • WS-200FT: with traditional Flat Tip Nozzle (Round nozzle) delivering high quality results.

APPLICATION

FEATURES

- Perfect surfaces thanks to the Split Nozzle™ technology
- Specific for blending, for example for side walls, bumper and smaller areas
- Barely visible transitions thanks to the soft and fine spray pattern
- Very fine atomization with low air consumption (190 l/min)
- Extremely low material consumption
- Low background noise
- 320 g: one of the most lightweight Smart Repair spray guns on the market
- Simple operation of the control knobs, for right and left handers
- Conical seal nozzle, minimum wear parts
- Clearer design, easy maintenance
- Quality surface for easy cleaning

1-1 Air Cap Packing White: Seals air cap to tightening nut	1-2 Air Cap Packing Transparent: Seals air cap to gun body (transparent seal must be visible from the inside of the air cap)	TIPP: change always both air cap packings as a couple:	13.1 Lock Fluid Adjustment*	7.1 Quick Fan Pattern Control*	7.2 Push Pull Pattern Adjustment Set*	7.3 Lock Pattern Adjustment*	19.1 SPANNER for Lock Pattern Adjustment and Lock Fluid Adjustment

HIGH QUALITY

FEATURES

- Universal spray gun for industrial coating
- VOC-compliant professional spray gun (more than 65% transfer efficiency)
- Large and uniformly shaped wet core, even with high viscosity materials
- 280 NI/min air consumption; also suitable for small compressors capacity
- Low background noise
- 380 g: one of the most lightweight spray guns on the market
- Conical seal nozzle, minimum wear parts
- Quality surface for easy cleaning
- Clearer design, easy maintenance

DOUBLE DIAPHRAGM

DPS-120 & DPS-90 PUMP UNITS

FEATURES

Double Diaphragm paint pumps come in a compact and stylish designs. They are the perfect choice for the delivery of fluid media (solvent and water-based paints) to the supply of manual and automatic spray guns.

Fully pneumatic pump control with Double Spool air circuit. The reliable pump motor combined with the Double Spool air circuit promises an excellent finish. (Air pressure circuit conform to safety standard UNI EN 12621).

The pneumatic control system prevents the forced stoppage of the pump. Dead storage material channels and easily collapsible pump structure facilitate cleaning, inspection and maintenance.

Wear-resistant pump assembly.

Available also with a 2-way connection (Aluminium & Stainless Steel models).

TECHNICAL DATA

Ratio	1:1	
Max. Working Pressure	7 bar (100 psi)	
Fluid Output at 30 cyc./min.	4.5 lt./min	1.5 lt./min
Fluid Output at 200 cyc./min. max	30 lt./min	10 lt./min
Paint Viscosity	85 sec/Ford#4	
Working Temperature	5~40 °C	
Paint outlet filter	100 mesh	
Suction paint filter	50 mesh

PAIN T PRESSURE TANKS

PET SERIES (max. 7.0 bar)

The Anest Iwata PET paint pressure tank series guarantee a valid and reliable fluid supply system for spray guns and other pneumatic equipments. The system is an excellent tool to allow a valid dilution, a correct density and a constant mixing of the paint (constantly stirred if required) with low pressures and flow rates.

TECHNICAL DATA				
Max. Working Pressure	7 bar (100 psi)			
Air Inlet Joint	G 1/4" M			
Fluid Outlet Joint	G 3/8" M			
Working Temperature	5~40 °C			
Mass	PET 10 N	153 Kg	PET 10 MN	17.5 Kg
	PET 30 N	204 Kg	PET 30 MN	22.6 Kg
	PET 50 N	115.3 Kg	PET 50 MN	28.2 Kg
Dimension	PET 10 N / -10 MN		540 x 330 mm	
	PET 30 N / -30 MN		710 x 415 mm	
	PET 50 N / -50 MN		810 x 470 mm	

FEATURES

- Stainless steel container, polished inside
- PET 10 (10 lt.), PET 30 (30 lt.), PET 50 (50 lt.)
- N: without pneumatic agitator
- MN: with pneumatic agitator
- Second fluid connection (optional)
- No additional lubrication of drive required
- All models conform to ATEX

PAINT PRESSURE TANK

PET-10 (max- 4.0 bar)

FEATURES

- Paint pressure tank with stainless steel inner tank for easy filling of the appropriate material and a trouble-free interior cleaning
- Robust construction
- Suitable for hydraulic products
- Carry handle for quick and easy transport
- Equipped with locking lid, 2 controllers, 2 pressure gauges and safety valve
- Compliant to ATEX

INNER TANK IN **STAINLESS STEEL**

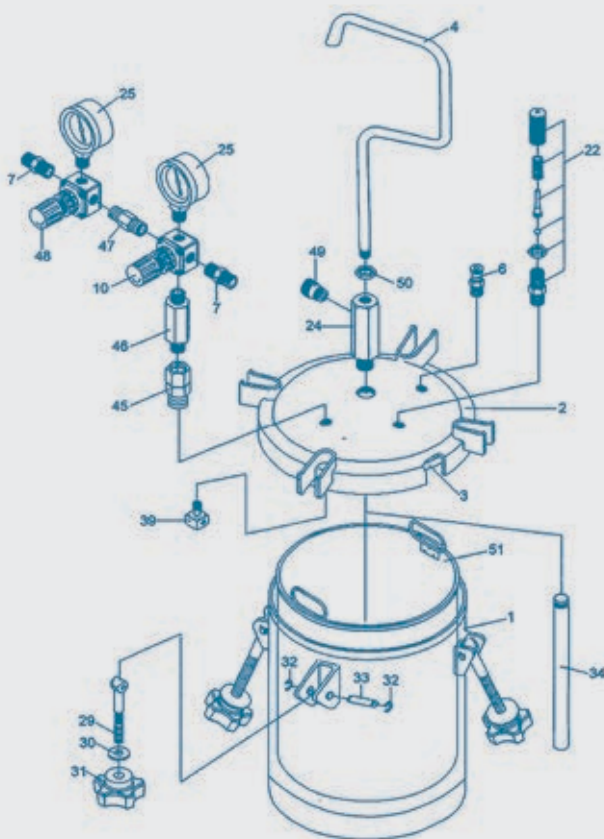

TECHNICAL DATA

Max. Operating pressure	4.0 bar
Tank capacity	10 liter, inner tank 8.5 liter stainless steel
Air inlet joint	G 1/4 "M
Fluid output join	3/8 "M
Operating temperature	5-40 °C
Weight	11 Kg
Dimensions	310x310x565 mm

HEALTH PROTECTION

VIPER HALF FACE GUARD MASK

HALF MASK with INTERCHANGEABLE COMBINED FILTERS

FEATURES

- Full field of vision
- Quick bayonet fittings
- Secure fit
- Large filter surfaces

Medium Capacity Organic Gas/Vapours Filter (hydrocarbons and solvents) - EN14387:2004
High Efficiency Particles Filter - EN143:2000 + A1:2006

The spectrum of action of harmful substances is large, then it is necessary identify with great precision the specific risks present in each workplace. The half mask respirators have two different types of filters that offer effective protection against dust, gases and vapors. Wearing protective masks and using them correctly can ensure an effective protection of the health against toxic substances.

Filters in two versions

- A2P3R filter for high protection
- AB1P2R filter for standard protection

Built-in inhalation valves in the filter
Low inhalation resistance

A2P3R HIGH PROTECTION COMBINED FILTERS

Filter marking: A2P3R	
A2	(A = organic gas/vapours, bp >65°C) (2 = medium capacity)

AIRFED 2010 FULL FACE MASK

One of the biggest risks to the health of the human body is the inhalation of dust, paint mists, gases, vapors or other contaminants, which can be greatly hazardous to our health, even in small quantities. For this reason, it is of extreme importance to use masks to protect against respiratory aggressions that you can undergo during job in a saturated environment of toxic substances. Anest Iwata offers excellent protections to always ensure your safety in all kind of environments. AIRFED 2010 Full Face Mask is functional and stylish. Suitable for use with previously filtered compressed air.

FEATURES

- Very good all-round visibility with large visor
- Head protection and comfort headband
- Visor with quick-change protection film
- Individually adjustable belt
- Easily adjustable width adjustment
- Adjustable fresh air regulator
- Activated carbon filter
- Air indicator
- 15 m hose (inside diameter 8 mm)

CLEANING

PCA12.0 & HCA12.0

ANEST IWATA High Quality Atomizers are especially suited for automotive industry, motorcycle and bicycle garages, machine and metalworking industries and workshops.

FEATURES

High quality, robust pump spray bottle for quick cleaning of spray guns

Special, adjustable nozzle \varnothing 0.8 mm (nickel-plated brass)

Powerful piston pump (nickel-plated brass) for an operating pressure up to 12.0 bar.

1 lt. capacity with large opening.

Level indicator and measurement scale.

Perfect stability.

Ergonomically shaped handle for easy operation.

PCA12.0 with solvent-resistant specialty gaskets (BMS 2010 black) for use with aggressive cleaners, resistant to all common solvents.

HCA12.0 with chemically resistant Viton seals (FKM (Viton) green) for use with mild cleaners, to 95% for cleaning of basecoat.

CLEANING

CLEANING & MAINTENANCE TIPS

DISASSEMBLING and CLEANING

Disassembly of fluid needle, fluid nozzle and air cap

1 Remove the needle adjustment knob and needle spring

2 Take out the fluid needle

3 Take out the air cap

4 Unscrew and remove the fluid nozzle by the universal spanner

Cleaning and drying of the spray gun

NOTE
During the cleaning operation be sure to always use a compatible cleaner and the spray gun parts.

1 Clean the paint passages by using compatible cleaner and the twisted brush \varnothing 10 mm

2 Clean the passages of the fluid, by using a blow gun and a twisted brush \varnothing 10 mm

3 Clean the spray gun surface

4 Dry paint passages by using a blow gun

Cleaning of atomizing parts

1 Clean the fluid nozzle small holes with a tiny twisted brush \varnothing 3 mm

2 Clean the central nozzle orifice with a tiny twisted brush \varnothing 3 mm

3 Clean the tip of the fluid nozzle carefully with a brush

4 Clean carefully the nozzle threads with a brush

5 Clean smoothly the internal nozzle part, by using the most suitable brush size

6 Clean the air cap center hole with the most suitable twisted brush size

7 Clean the tiny air cap holes with the most suitable cleaning needles size

8 Clean the air cap horn holes with the most suitable cleaning needle size

9 Clean the rear air cap holes with the most suitable cleaning needle size

10 Clean the fluid needle with the most suitable brush

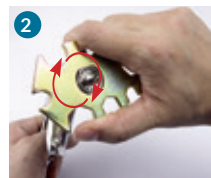

IMPORTANT. During the manual cleaning operations, be sure to never use any brushes with metal bristles, which could damage the internal parts or the surface of the spray gun.

ASSEMBLING

Assembling and maintenance

1 Assemble the fluid nozzle by hand

2 Tighten up the fluid nozzle by the universal spanner

3 Assemble the air cap, adjust it with the right orientation and tighten it by hand

4 Grease the needle

5 Insert the fluid needle in its seat

6 Grease the threads of fluid adjustment knob

7 Grease the needle spring sections and insert it in its seat

8 Grease the air valve bar behind the trigger

9 Adjust needle packing (15-60 degree tighten), by using the special spanner

10 Check if the trigger glide is smoothly.

IMPORTANT. The use of silicone-free Anest Iwata spray gun grease in maintenance operations, has proved to be a needful means to guarantee the perfect functionality of all moving parts and thread sections of the spray gun and to increase their resistance to wear.

CLEANING & MAINTENANCE TOOLS

THE KIT **W2KITUK** INCLUDES

- 2 Big Surface Brushes - 1 Flat Brush - 1 Big Twisted Brush - 3 Twisted Brushes (1x Ø 10 mm - 1x Ø 5 mm - 1x Ø 3 mm)
- 1 Tiny Twisted Brush - 4 Very tiny Twisted Brushes - 12 Cleaning Needles
- 1 Premier Maintenance Grease.

MANUAL WASHING

KUIK MINI GUN WASHER

FEATURES

Kuik mini gun washer is a small, compact and unique water and solvent gun washer machine which is possible to be used inside or outside the spray booth and it is easy to be transported. The gun washer has separate nozzles for internal and external cleaning of the spray gun. It is possible to pre-clean with dirty water or solvent and to do the final wash with clean water or solvent. The gun washer has an aspiration system to avoid that residual gasses remain trapped. An air blow gun is included.

MANUAL WASHING

IWK-H2O GUN WASHER

FEATURES

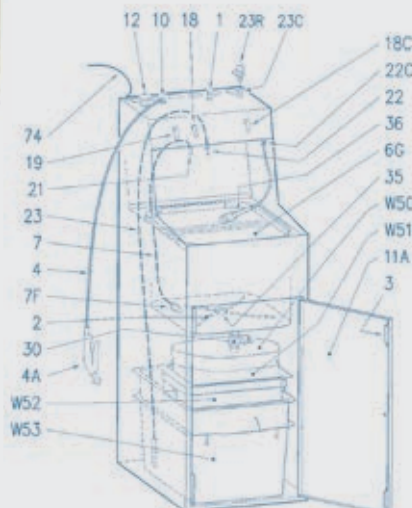

IWK H2O FOR WATER BASED PAINT ONLY: a small and cost-effective pneumatically operated machine for manually washing water-based paint from spray guns and small objects. The instruments, located on the front section, make it easy to use. The spray-washer is fitted with a small pump and sprayer which draws clean water from a container located at the bottom of the machine and a second sprayer for final washing which is connected to the company's water supply. A blowing gun then cleans and dries the guns and washed pieces.

SEPARATING THE PAINT FROM THE WATER: the stainless steel washing tank has an internal system that mixes the dirty water with flocculating powder. The water and coagulated colour deposit are then discharged by a valve in the filter bag kit, where solid particles are separated from the water particles. The filtered water can be re-used for washing.

SPRAY GUN SUPPORTS

MAGNETIC SUPPORT & GUN HOLDERS

MAG STAND - Magnetic Support

FEATURES

Practical for every bodyshop, fast, flexible and reliable adhesion on all metal surfaces thanks to an extra-strong all-surface magnet.

Hold up to 20 kg (each holder, measured on a clean metal surface).

No cumbersome, wall mount without screws and drilling.

Easy removal from spray booth.

Prevent potential accidents.

Significant space savings in working area.

ORDER INFORMATION

CODE	DESCRIPTION	REF.
W2COM6052	MAGNETIC SPRAY GUN HOLDER (for Spray Guns)	1
W2COM6120	MAGNETIC SPRAY GUN HOLDER (Single Spray Gun)	2
W2COM6093	MAGNETIC ADAPTOR HOLDER (for PS-RPS Adaptors)	3
W2COM6094	MAGNETIC AIR HOSE HOLDER (Max. Length 20 m)	4

GRAVITY GUN HOLDERS

FEATURES

Suitable to hold Gravity Guns after use or during the filling of the cup.

Available in 3 versions with base:

- Single Central Gravity (wall mountable)
- Multiple Central Gravity (3 places)
- Single Side Gravity

ORDER INFORMATION

CODE	DESCRIPTION	REF.
W2501000500	CENTRAL GRAVITY GUN HOLDER (3 SPRAY GUNS)	A
W2501000100	CENTRAL GRAVITY GUN HOLDER (1 SPRAY GUN) WALL MOUNTABLE	B
W2501000600	SIDE GRAVITY GUN HOLDER (Single)	C

MAGNETIC SPRAY TESTER

FEATURES

Test the spray pattern with the portable magnetic Anest Iwata spray pattern tester and compare regularly compliant tabulated and efficiently the quality of the spray images.

Portable spray pattern tester for regular monitoring of the spray pattern quality

Fast, flexible and reliable adhesion of the spray pattern tester on all metallic surfaces thanks to an extra-strong full-surface magnet.

Easy wall mounting: no drilling, no screws.

Spray pattern tester lid opens downward for more freedom in the spray pattern test

Perfect horizontal alignment by an integrated vertical spray ruler.

Dimensions: 46 cm (B) x 75 cm (H) x 5 cm (T)

AIR FILTERING

AIR FILTER REGULATORS 1/2"

SINGLE-STAGE

FEATURES

- 1 Inlet ball valve 1/2"F (allows removal of filter cartridge without stop compressor operation).
- 1 Filter Regulator: from 0 to 8.5 bar.
- Filtration rating 5 μ .
- 1 Pressure Gauge: from 0 to 10 bar.
- 1 Semi-automatic drain valve (to prevent decompression during application).
- 2 Outlet ball valves 1/4"M, with stop valve.
- 1 Wall bracket with 2 mounting holes.
- Filter body and bowl treated with anti-corrosion coated.
- Max. flow rate: 2800 l/min.

1/2" SINGLE-STAGE

ORDER INFORMATION

CODE	DESCRIPTION
D9250112	AIR FILTER REGULATOR 1/2"F - SINGLE-STAGE 5 μ NM
D9250041	FILTRATION CARTRIDGE 5 μ NM

DOUBLE-STAGE

FEATURES

- 1 Inlet ball valve 1/2"F (allows removal of filter cartridge without stop compressor operation).
- 1 Filter 3 μ : filtration efficiency 99% with semi-automatic drain valve.
- 1 Air Regulator from 0 to 8.5 bar with pressure gauge from 0 to 10 bar.
- 1 Coalescence filter 0,01 μ : filtration efficiency 99,99% with semi-automatic drain valve.
- 1 Outlet ball valves 1/4"M, with stop valve.
- 1 Outlet quick joint F.
- 1 Wall bracket with 4 mounting holes.
- 1 Saturation indicator.
- Filter body and bowl treated with anti-corrosion coated.
- Usable with 2 or 3 spray guns.
- Max. flow rate: 1000 l/min.

TRI-STAGE

FEATURES

- 1 Inlet ball valve 1/2"F (allows removal of filter cartridge without stop compressor operation).
- 1 Filter 3 μ : filtration efficiency 99% with semi-automatic drain valve.
- 1 Air Regulator from 0 to 8.5 bar with pressure gauge from 0 to 10 bar.
- 1 Coalescence filter 0,01 μ : filtration efficiency 99,99% with semi-automatic drain valve.
- Active carbon filter with separation degree <3.5 particles 0,3 μ /l air.
- 1 Outlet ball valves 1/4"M, with stop valve.
- 1 Outlet quick joint F.
- 1 Wall bracket with 4 mounting holes.
- 1 Saturation indicator.
- Filter body and bowl treated with anti-corrosion coated.
- Usable with 2 or 3 spray guns.
- Max. flow rate: 1000 l/min.

CONDUCTIVE AIR/FLUID HOSES & COUPLINGS

PREMIUM ANTISTATIC AIR HOSE

FEATURES

High quality ANTISTATIC AIR HOSE with high-strength synthetic textile braid. Available in 3 different lengths: 6 m - 10 m - 15 m

Clamped with fittings and safety quick coupling: air hose is vented in a first step and can then be safely disconnected in the second step

Very light, flexible in itself, noticeably handier

Quick coupling (NW 7.2) and nipple in Nickel Plated Brass

Conductivity: $R < M\Omega$ EN1953

Inner diameter \varnothing 9 mm, outer diameter \varnothing 15 mm

Max. operating pressure 15 bar

Weight with standard length of 10 m: 1,5 kg

DRYING SYSTEM

DRYING SYSTEM

INFRARED UNIT

FEATURES

The use of short wave infrared technology enables body fillers, primers and paints to be cured in 10 minutes as opposed to 45 minutes in an oven. Anest Iwata infrared mobile drying systems provide a fast efficient answer for all your local body repairs. Infrared units are a cost effective method of paint drying, and curing can be achieved in just minutes, using the highly effective short wave infrared lamp. Anest Iwata infrared units are available in a number of options.

DRYING SYSTEM

ADG-1B AQUADRY PAINT DRYER GUN

AQUADRY KIT IS A VERSATILE SYSTEM TO SPEED UP THE DRYING PROCESS OF WATER BASED COATINGS

Its exclusive configuration provides an extremely uniform air flow system, which considerably reduces the drying time of the painted surfaces, thanks to the considerable acceleration of the water evaporation contained in the paints. The control of the air volume produced by the gun is about 6 times its air consumption. The use of a single device is particularly suitable for small areas, while the system mounted on the stand is particularly suitable for larger surfaces and commercial vehicles.

FEATURES

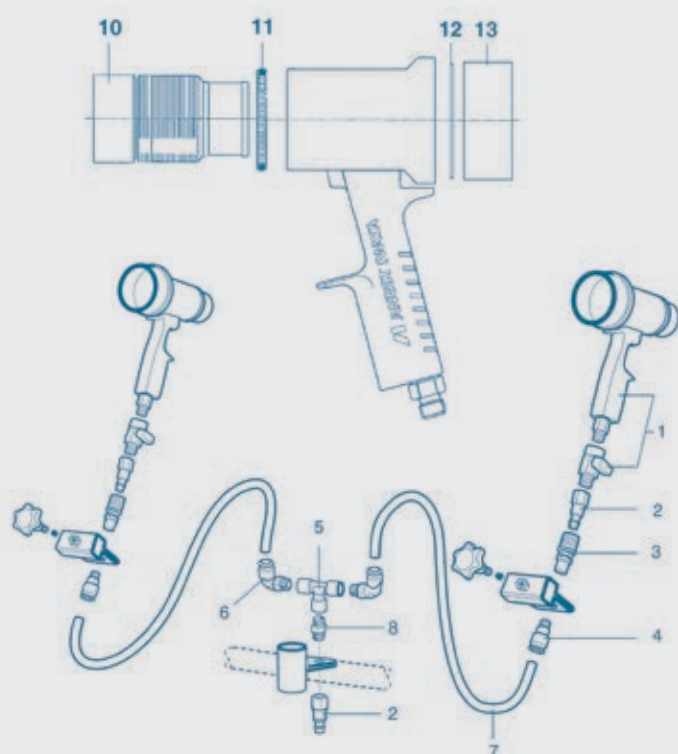

- Guns are provided with quick couplings which allow fast disassembly
- Air regulator included
- 2 Guns are easily and independently adjustable (height from 0 to 210 cm)
- Each gun can be used independently
- The stand has a slide and lock height adjustment.
- Gun brackets can be moved along the length of the arm and positioned to suit, max adjustable 80 cm
- Sturdy and dismountable steel base with rubber foot 62x62 cm
- Venturi air entrainment increases air flow by 6:1

TECHNICAL

- Max. pressure: 7 bar
- Max. air consumption: 2 x 600 lt./min

cm
80 x
210 h

AI JET FLAT AIR NOZZLE DRYER

FEATURES

The AI JET Flat Fan Air Nozzles series are ideal to be used for the processes of drying and curing of water-based paints.

The flow of compressed air, passes through the nozzle and it is distributed through 16 holes (ø 1.5 mm), ensuring a wide range of air distribution and an excellent uniformity in the drying process.

The ergonomic design and its small dimensions, allow its use even in very small spaces.

The use of the AI JET air nozzles reduces the consumption of compressed air than other systems and allows the drying process in shorter times on surfaces of small and medium size, as well as a considerable reduction in noise.

AI JET is supplied with ball valve and quick coupling joint M.

TECHNICAL

Noise Level: 70 db (A) at 2 bar

Air Consumption: 18 m³/h at 2 bar

Max. Pressure: 6 bar

Max. Temperature: 50°C

DEMO TOOLS

DEMO TROLLEY

ANEST IWATA Demo trolley is a practical and lightweight trolley to tow, perfect for protecting your valuable tools. Externally is made of sturdy and shockproof plastic material, durable but lightweight with a professional design. The inside is a foam lined safe housing which can snugly fit five spray guns. In addition, there are spaces cut out of foam designed to preserve the enclosures that can contain both the fluid nozzle and needle sets and the air cap sets, such as: 15 rotating telescopic enclosures to protect fluid needles and fluid nozzles and 7 enclosures with lid to protect the air caps.

FEATURES

Demo trolley is flexible to be equipped and also suitable for spray guns and accessories from other manufacturers, it is structured with:

- 5 places for spray guns
- 2 places for mini spray guns
- 2 places for pressure gauges
- 1 place for gravity cup 70 ml
- 1 big place with a shapeable foam for bulky items (as gravity cups or cleaning tools)

TECHNICAL

Dimensions: 604 (W) x 473 (D) x 283 (H) mm
 Empty weight: 9 kg
 IP 67 classification; 100% recyclable material

ORDER INFORMATION

CODE	DESCRIPTION
VPATR-IW01	DEMO TROLLEY & SES KIT
VROTRPACK	& SES KIT SINGLE (2 parts)

Spray guns are not included in Demo trolley.

CASES KIT

7x Case

15x Telescopic twist case for nozzle/needle

5x Spray guns

2x Small Spray guns
 2x Pressure Gauges
 1x Gravity cup 70 ml

Flexibly equipped
 Gravity cups & Cleaning kits
 Bulky parts
 Shapeable foam

OTHER ACCESSORIES

MINI BLOW-OUT GUN

FEATURES

Mini blow gun for the dedusting, cleaning and drying of tools and Jobs
 Compact and lightweight (made from the high-tech composite polyamide)
 Robustly for increased longevity and insulating for a pleasant working temperature
 Precise and powerful with high flow and low air consumption
 Ergonomic and ultra-modern
 Max. operating pressure: 12 bar; Weight: 90 grams
 For even more ease of use: Direct connection to the ANEST IWATA security clutch

ORDER INFORMATION

CODE	DESCRIPTION
DE510001	MINI Blow-out gun
W3COM6085	SAFE CLUTCH NW 7,2; SPOUT ø 9mm

PAINTING TIPS

SPRAY GUN & NOZZLE CHOICE

Anest Iwata with the most important paint manufacturers determines the best spray guns settings and the nozzle choice according to paints and models. To find the most suitable nozzle diameter and air inlet pressure, you can refer to the recommendations listed in the technical details of each product page.

ATOMIZING & AIR PRESSURE ADJUSTING

Install the pressure gauge to the air inlet pressure control of the spray gun. Then connect the spray gun to the supply of the compressed air.

WARNING: To supply compressed air to the spray gun, always use clean air filtered through an air dryer and an air filter.

Fully open the pattern adjustment valve and the air flow control valve.

NOTE: The air flow control valve must not be used, except when you want to reduce the pattern width.

Keep the trigger fully hold during adjustment. Adjust pressure by the main air regulator of the spray booth, making sure that the pressure value on the pressure gauge under the gun is correct.

FLUID OUTPUT ADJUSTING

The adjustment of fluid output can be left completely open and adjusted by opening and closing the trigger during painting operations.

Some paint manufacturers recommend to adjust the fluid output based on the number of turns of the fluid-adjustment knob and in this case, the recommendations must be strictly observed.

SPRAY GUN USE

The spray gun must be always held perpendicular to the surface that has to be painted. When painting, the spray gun should be moved with a fluid and free motion of the arm, in a horizontal and straight line from right to left and back so that each passage covers the previous one by 50-75%. The molded parts, the edges and the interior of the car should be painted first.

SPRAY DISTANCE

The spray distance of the gun from the surface must be between 130 - 200 mm: set the spraying distance as close as possible to this range. With Supernova spray guns the recommended spraying distance must be between 130 -150 mm.

Anest Iwata provides a Magnetic Spray Tester, which is an accessory to test the quality of spray the pattern.

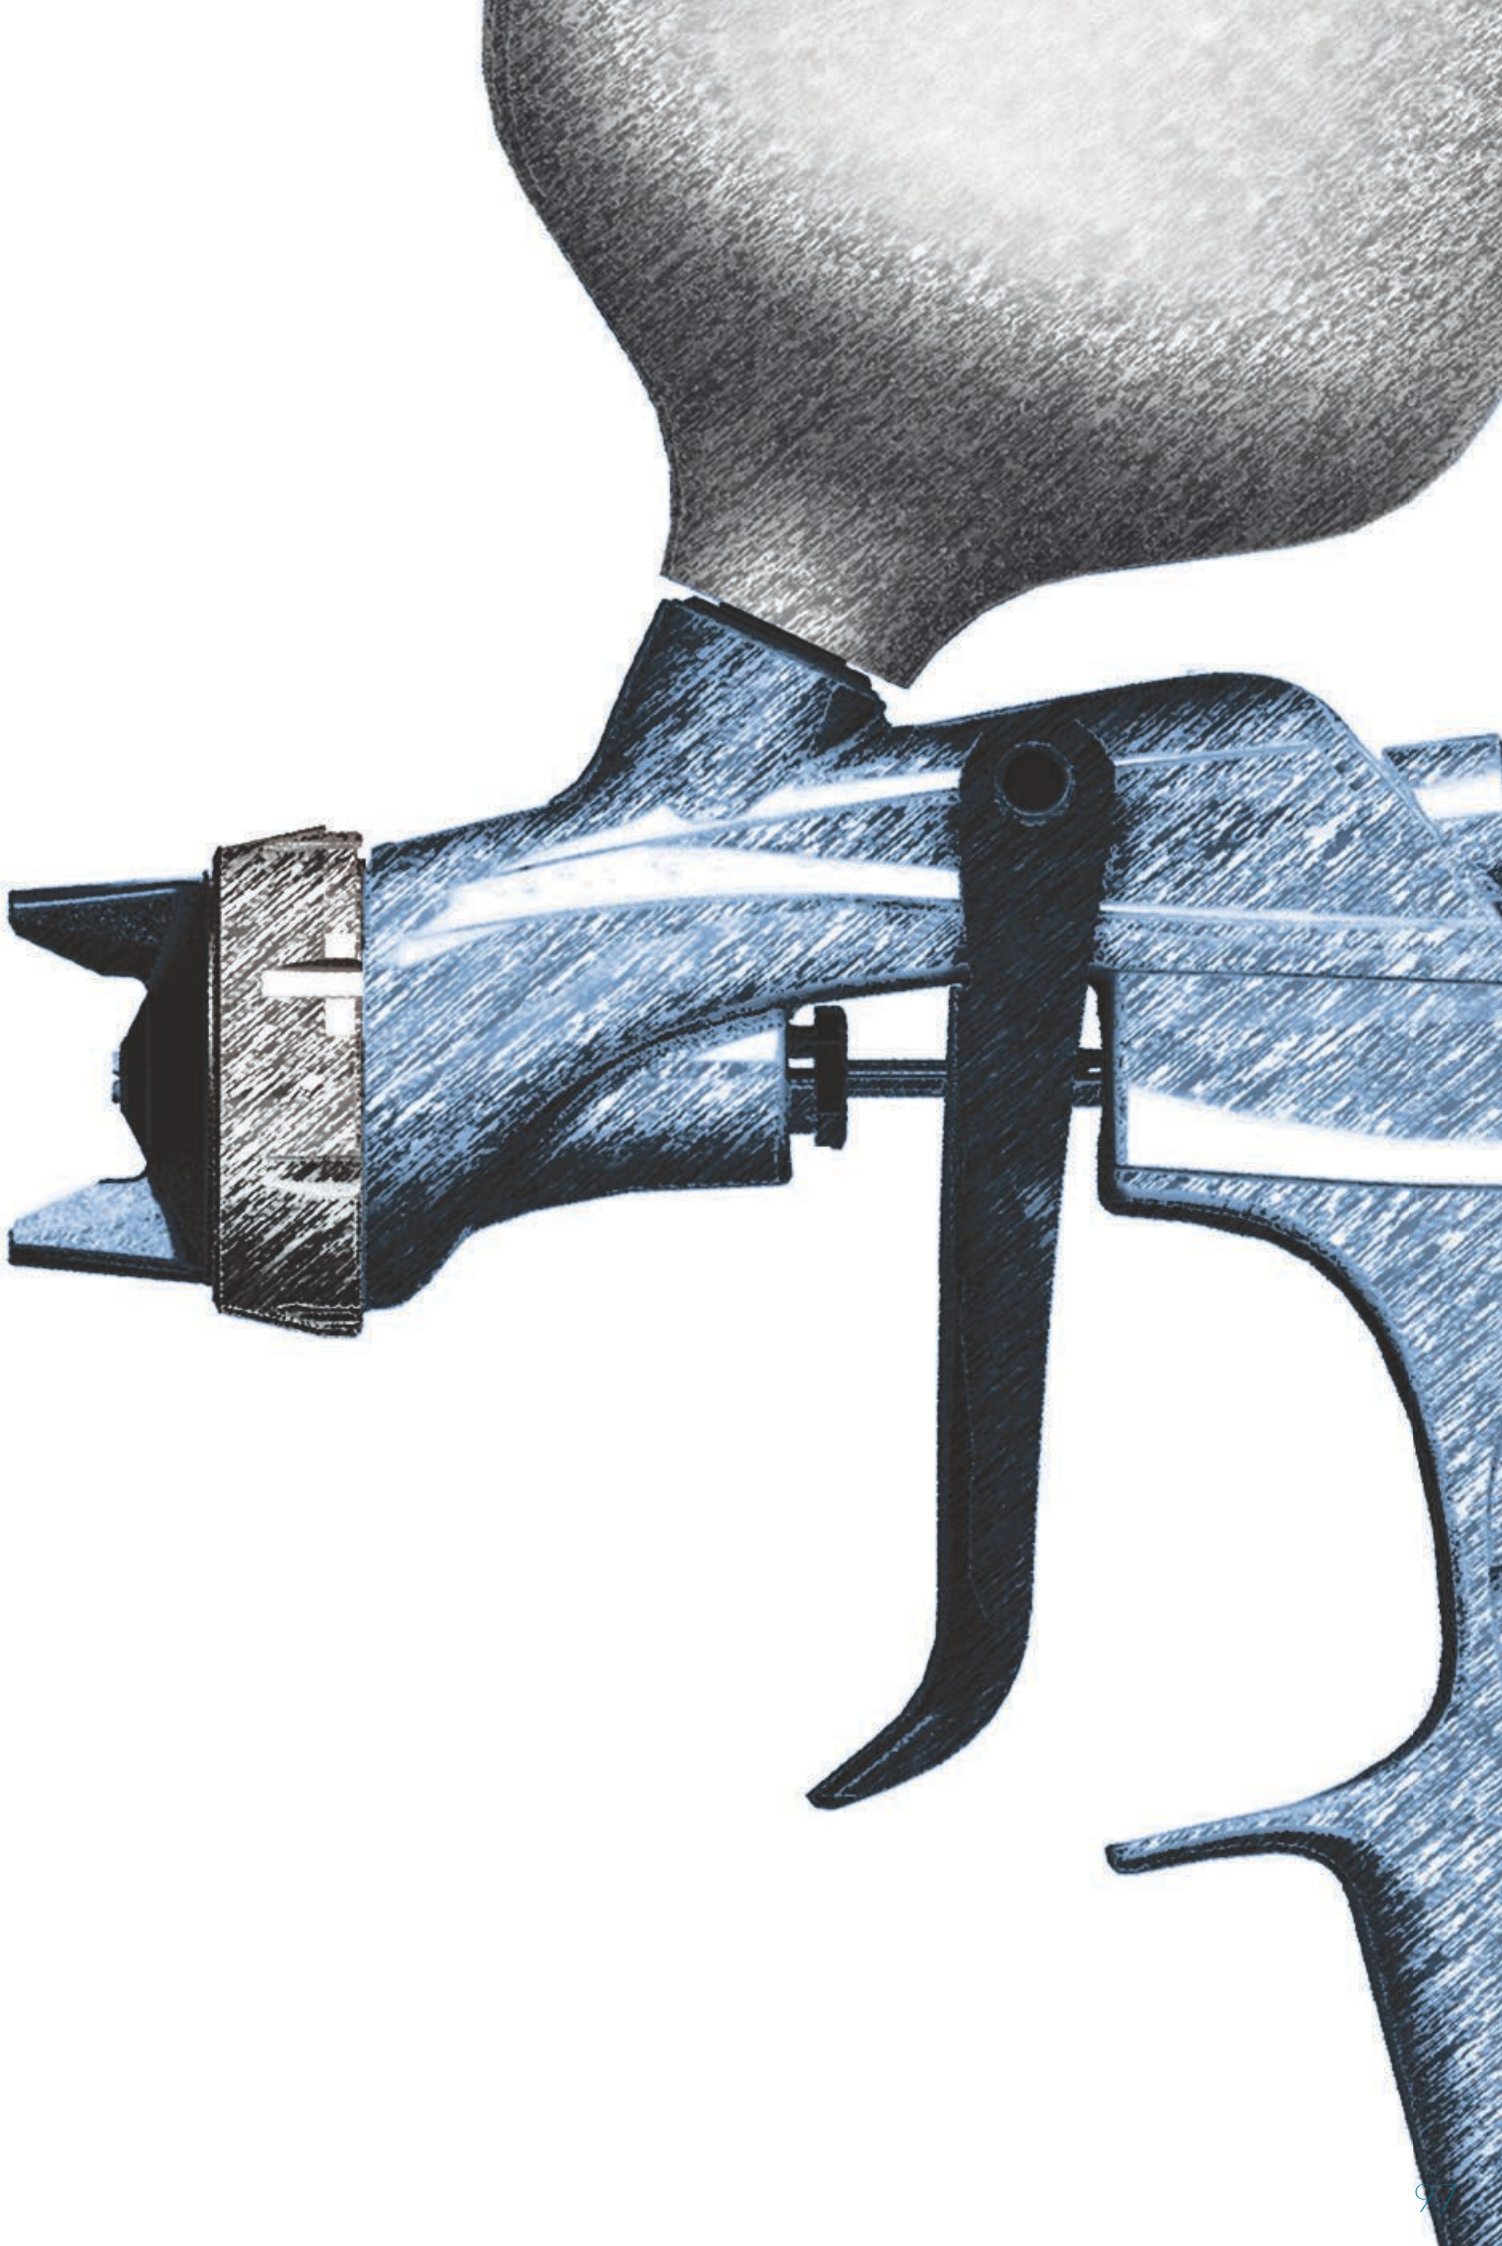

SAFETY PROTECTION

During painting operations always wear protective gear such as safety glasses, mask, overalls, gloves and so on, to avoid inflammation of eyes and skin. Anest Iwata offers a wide range of health protection devices available in the accessories section

CLEANING & MAINTENANCE

Before spray gun use, adjustments or maintenance, it is important to read very carefully the instruction manual supplied with the spray gun. Instructions for cleaning and maintenance are also displayed on the front panel of the Magnetic Spray Tester.
