

JAG MAR

CENTRUM PNEUMATYKI

JAG-MAR Company, based in Kalisz, has been offering the highest quality of products and services since 2007. Our experience in pneumatic branch, the continuous training of staff and expansion of the high-quality product offer allows for the meeting of even the most demanding clients' needs. You can find products of renowned manufacturers in the pneumatic sector. JAG-MAR offers also compressors and pneumatic tools service.

Our offer comprises:

- reciprocating and screw compressors and accompanying accessories: containers, pumps, filters, FLR Air Units
- pneumatic tools: wrenches, grinders, riveting machines, drills, hammers, adhesive systems and necessary accessories
- accessories for pneumatic systems: couplings, quick-couplings, valve islands, FRL accessories, fittings, actuators, diaphragm pumps
- wide range of spray equipment: spray guns and pumps, pressure vessels, agitators, spray gun cleaners
- nailers, staplers, brad nailers and spare parts
- connectors for timber: nails, staples, brads
- machines and tools for upholstered furniture production
- pallet nailing tables
- tools for point cold pressing - clinching
- balancers, hoists and pneumatic trolleys
- power tools: FESTOOL, DeWalt, Metabo
- cutters, drill bits, saws, CMT saw blades, clamps and telescopic supports from PIHER

We are also available on the Internet at the following addresses:

We welcome your questions, so that the products will meet your expectations.

We invite you to meet our offer and enjoy your shopping!

COMPRESSORS

Compressors / rotary screw and reciprocating compressors, oil, oil-free

Compressor elements: pumps, pressure vessels, safety valves

Air treatment: driers, FRL Air units, filters, separators

Compressors are vital machines for handling pneumatic tools which need compressed air. The ones that we have on offer, thanks to their parameter variety, will give you the possibility to choose the best model to fit your needs. Our selection of goods also includes piston pumps and pressure valves as well as a range of accessories for compressed air installation and treatment.

Air Compressor service

In terms of maintenance, renovations and running repairs of multi-brand screw and reciprocating compressors we started a mobile service for you.

PNEUMATIC TOOLS

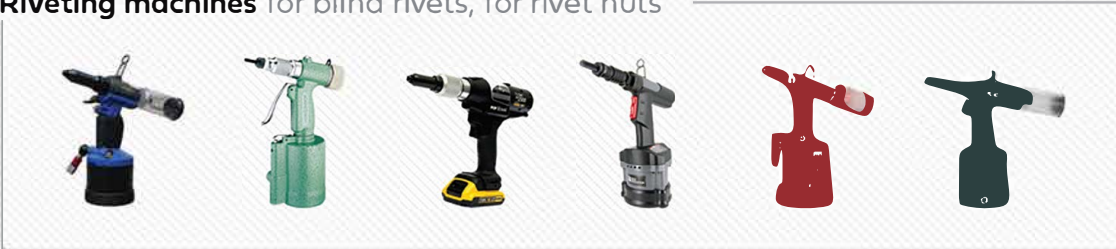

Impact wrenches impulse or ratchet action

Die, rotary, angle, belt grinders

Riveting machines for blind rivets, for rivet nuts

Angle, pistol and straight drills

Angle, pistol and straight screw guns

Pneumatic tools enjoy an excellent reputation due to their durability and safe handling not requiring the electricity supply. They are also high-power tools thanks to compressed air. Our offer will meet the requirements of both amateurs and professionals.

PNEUMATIC TOOLS

Needle hammers, for eyeleting, chipping hammers

Lubrication systems, oil changers, oil drains

Soldering guns, adhesive systems

Pneumatic accessories, blow guns

Hoses, hose reels, wires

Extruders for mass in sachets, silicon mass for cartridges

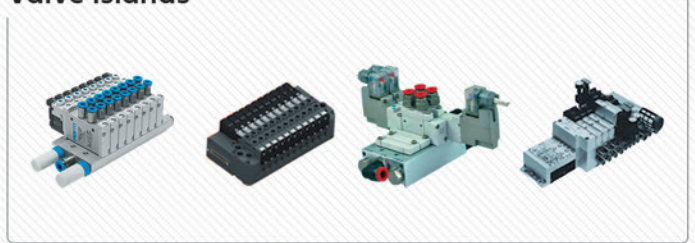

INDUSTRIAL PNEUMATICS

Couplings and quick-couplings

Valve islands

Electrovalves and pneumatic valves

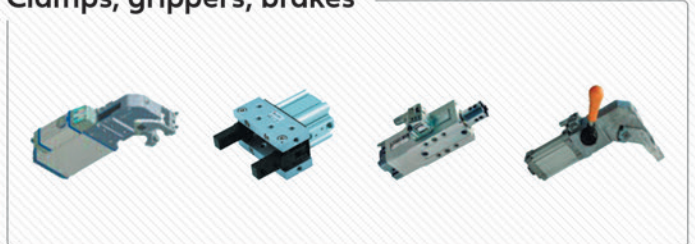

FRL air units

Actuators

Clamps, grippers, brakes

Industrial valves

Diaphragm and pulse electrovalves

YAMADA Diaphragm pumps

ESAM side-channel blowers

In our wide offer you can find not only high-quality tools, but also elements of industrial pneumatics produced by the leading global brands. We offer such elements like couplings, hoses, FLR Air units, control valves, actuators and related accessories. For clients who seek individual and sophisticated solutions in terms of pneumatics, we offer help and engagement.

SPRAY PAINTING EQUIPMENT

Manual and automatic guns

Piston spraying pumps, diaphragm pumps

Pressure vessels 10-60 l with manual and pneumatic agitator

Pneumatic agitators

Spray gun cleaners, driers, distilleries, filters

For customers from the spray painting sector we created a professional offer that comprises spray guns and necessary accessories for varnishing and painting. Guns, that we offer, will streamline work, save time and ensure a perfect final result. Depending on the needs, we have gravity and bottom feed models. What is more, we offer guns that work with big, external tanks. Spray gun washers by B-TEC will keep your painting equipment clean.

IMPULSE NAIL TECHNIQUES

Nail guns for woodworking, roofing and concrete; gas and battery powered

Brad nailers and staplers suited for all fastening applications: upholstery, roofing, carpentry, framing

Fasteners, staples, nails, brads

Spare parts, fuel cells

Permanent connections of wooden constructed elements are provided by using nails, staples or brads inserted with nailers, staplers or brad nailers; so effective thanks to compressed air. They ensure intense pace of work, precision manufacturing and they are effortless for the operator. In our great selection of goods you can find tools for impulse nail works and a wide range of fasteners.

PNEUMATIC TABLES

Machines for upholstery furniture

Our offer comprises: cutting tables, band knives, upholstery tables, fabric spreading machines, upholstery presses, pneumatic upholstery presses, machines for loading corrugated springs, ultrasonic cutters for fabrics, sewing machines stands, rewinders, fabric inspection machines, spreading and fabric cutting machines

Pneumatic tables for nailing pallets

Pneumatic tables Pneumatico PT-1900, PT-2300, PT-2300, PT-2800, PT-3300 are universal machines for semi-automatic nailing of wooden pallets of different types. There is a rail mounting system in the upper part of the table, which is equipped with balancers. Tables ensure the ergonomics and comfort of work. They guarantee the increase of productivity, save place (model PT-1900 takes only 4m²) and eliminate the additional costs of preparing templates for different types of pallets.

During the standard nailing process, two workers are able to produce about 250 pallets during an 8-hour shift. In contrast, a single operator using the PT-1900 table has the capability to produce 210-230 pallets over the same period of time.

Nailing tables contribute to the growth of labour productivity. They act like an adjustable template for EUR pallets and pallets on 2, 3 or 5 brackets. They are designed to be manned by just one operator, who can easily modify the table to the required size of the pallet. What is more, there is a possibility of the pneumatic clamp of the brackets and the pushback of the ready pallet. The work is effortless for the operator thanks to the system of suspended nailers on balancers.

and watch the movie!

BALANCERS, CLINCHING TOOLS

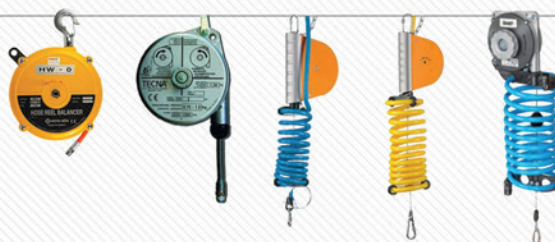

Balancers

- wire length: 1,6 – 3,0 m
- capacity range: 0,1 - 300 kg

Pneumatic balancers

- integrated with compressed air

Pneumatic hoists and trolleys

- capacity range: 0,125 - 100 tones
- the option of compressed air supply

TECNA®

IR Ingersoll Rand

Tigon

Carl Stahl®

ZENDO

NITTO KOHKI

RED ROOSTER

Balancers are a great support at every workplace where there is a necessity to use pneumatic tools. Thanks to the suspension on rope, the tool weight is balanced, which means that they decrease their actual total weight making it easy to manoeuvre. What's more, it minimizes the operator's effort. In our offer you can find balancers intended for various applications, equipped with spring – ratchet mechanism of capacity range starting with several decagrams up to over a hundred kilograms.

Clinching tools

Clinching technique is an innovative process for the mechanical cold junction of sheet metal. It is based on plastic deformation of the sheet metal, that is possible through the interaction between a punch and a die without the supplement of any additional material. The punch and the die, by spot pressing of sheet metals with a preconceived force that permits penetration of the punch into sheet metals, create a button that forms the "point" of the junction and the shape of which depends on the tool kit geometry.
