

Retractor EV **pneumatico**

KIT INCLUDES:

MADE IN POLAND

Retractor EV by **Pneumatico** is an innovative holder with automatic cable support function that revolutionizes the EV charging process. Using this holder you will forget about tangled and dirty charger cables. Retractor is available in 4 models, each with different retraction capacity: **EV0, EV1, EV2, EV3**.

Does the Pneumatico brand EV Retractor fit any charger cable?

✔ **16,5 - 32 mm**
✔ **1,0 - 8,0 kg**

Yes. When choosing a model of EV Retractor, pay attention to 2 parameters of the charger cable - its diameter and weight.

- ✔ **Personal and commercial use**
- ✔ **Simple installation**
- ✔ **Indoor and Outdoor use**

- ✔ **Durable rope**
- ✔ **Adjustable retracting capacity**
- ✔ **Weatherproof**

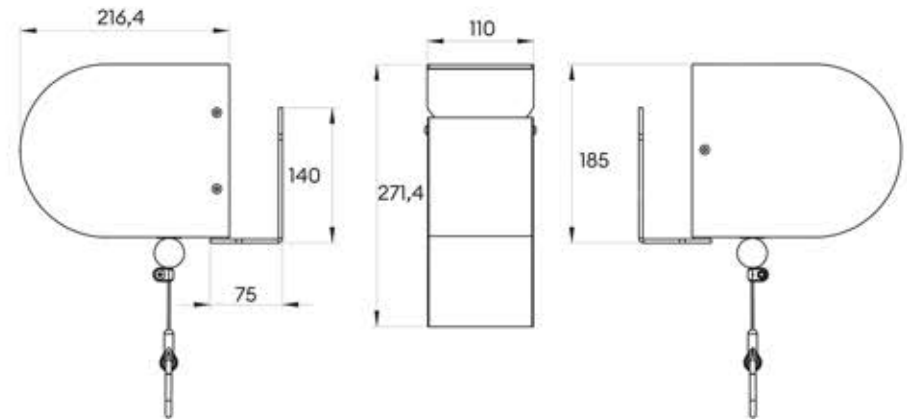

What is the **pneumatico** Retractor EV used for?

Retractor EV is used to manage the charger cable of an electric car. The Retractor's housing is made of galvanized steel, which provides resistance to adverse weather conditions. It rotates within the range of 180 degrees, making it easy to handle the charger cable.

Modern design and powder coating ensure high aesthetics of the product. The Retractor's cable is as long as 300 cm and is made of special, high-strength Dyneema® fibers that do not damage the car's body. At its end there is a swivel handle, which prevents the cable from twisting. The retracting force can be adjusted with a wrench. Retractor installation is simple and quick. The suspended cable always remains clean, as do the operator's hands.

Possible load capacity from 1.00 kg to 8.00 kg.

Retractora EV dimensions [in millimeters]

There are 4 Retractors EV available with different retraction capacity:

MODEL	CAPACITY	ROPE RETRACTION
EV0	1 - 2,5 kg	300 cm
